### Jada 30753

# Jada Fast & Furious 1:10 Toyota Supra Remote Control Car Instruction Manual

Model: 30753

## INTRODUCTION

---

This manual provides essential instructions for the safe and optimal use of your Jada Fast & Furious 1:10 Toyota Supra Remote Control Car. Please read through this guide carefully before operating the vehicle to ensure proper setup, operation, and maintenance. This product is suitable for ages 8 and up.

## PRODUCT OVERVIEW

---

The Jada Fast & Furious 1:10 Toyota Supra Remote Control Car is a detailed replica designed for remote-controlled driving and drifting. It features a 2.4 GHz frequency for multi-player use and a special turbo button for enhanced drifting capabilities.

**Image:** Front view of the Jada Fast & Furious 1:10 Toyota Supra RC car alongside its pistol-grip remote controller.

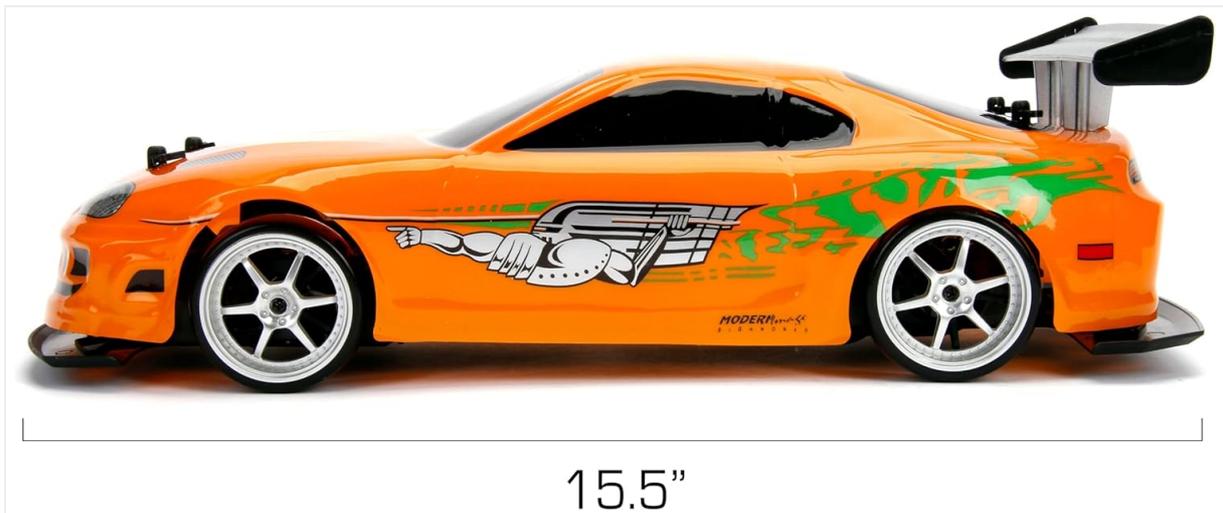

## SETUP

---

### 1. Unboxing and Initial Inspection

Carefully remove all components from the packaging. Ensure the following items are present:

- 1:10 Scale Toyota Supra RC Car
- Pistol-Grip Remote Controller
- AA Batteries (for controller)
- USB Charging Cable (integrated into the car)
- Extra set of tires (for drifting)

**Image:** The Jada Fast & Furious 1:10 Toyota Supra RC car shown in its retail packaging, highlighting the included extra tires and controller.

### 2. Battery Installation (Controller)

The remote controller requires AA batteries. Locate the battery compartment on the underside of the controller, open it, insert the included AA batteries, and close the compartment securely.

### 3. Charging the RC Car

The RC car has a built-in rechargeable battery. To charge:

1. Ensure the car's power switch (located on the underside) is in the "OFF" position.
2. Locate the integrated USB charging cable on the underside of the car.
3. Plug the USB cable into a powered USB port (e.g., computer, USB wall adapter, power bank).
4. A charging indicator light on the car will illuminate. The light will change or turn off when charging is complete.

**Image:** The underside of the RC car, showing the integrated USB charging cable and the power switch. A green light indicates charging or power on.

## 4. Pairing the Controller and Car

The car and controller operate on a 2.4 GHz frequency, allowing for multiple players. To pair:

1. Turn on the RC car using the switch on its underside.
2. Turn on the remote controller using its power button.
3. The devices should automatically pair. A light on the controller will indicate a successful connection.

## OPERATING INSTRUCTIONS

---

### 1. Controller Functions

Familiarize yourself with the remote controller:

- **Steering Wheel:** Rotate left or right to steer the car.
- **Throttle Trigger:** Pull to move the car forward. Push to reverse or brake.
- **Turbo Button:** Press and hold this button to activate the drift function, providing increased power to the wheels for sliding maneuvers.
- **Power Indicator Light:** Illuminates when the controller is on and paired.

**Video:** An official product video demonstrating the Jada Fast & Furious 1:10 Toyota Supra RC car and its controller functions, including the drift feature.

### 2. Driving and Drifting

Operate the car on smooth, flat surfaces for best performance. Use the throttle for speed and the steering wheel for direction. To initiate a drift, accelerate and press the Turbo button while turning the steering wheel. Practice is recommended to master drifting techniques.

## MAINTENANCE

---

### 1. Cleaning

Regularly clean the car to remove dust and debris. Use a soft, dry cloth. Avoid using water or harsh chemicals, as this can damage electronic components.

## 2. Tire Replacement

The product includes an extra set of tires, typically designed for enhanced drifting. To replace tires, carefully remove the existing wheels and mount the new ones. Ensure they are securely attached before operation.

**Image:** The extra set of tires included with the RC car, used for optimizing drift performance.

## TROUBLESHOOTING

Problem	Possible Cause	Solution
Car does not respond to controller.	<ul style="list-style-type: none"><li>• Car or controller is off.</li><li>• Low batteries in controller.</li><li>• Car battery is low or uncharged.</li><li>• Not paired correctly.</li></ul>	<ul style="list-style-type: none"><li>• Ensure both are switched ON.</li><li>• Replace controller batteries.</li><li>• Charge the car's battery.</li><li>• Turn both off and on again to re-pair.</li></ul>
Poor drift performance.	<ul style="list-style-type: none"><li>• Incorrect tires for surface.</li><li>• Insufficient speed or technique.</li></ul>	<ul style="list-style-type: none"><li>• Ensure drift tires are installed.</li><li>• Practice technique; ensure Turbo button is used.</li></ul>
Short operating time.	<ul style="list-style-type: none"><li>• Car battery not fully charged.</li><li>• Old or low-quality controller batteries.</li></ul>	<ul style="list-style-type: none"><li>• Fully charge the car's battery.</li><li>• Replace controller batteries with fresh ones.</li></ul>

## SPECIFICATIONS

- **Model Number:** 30753
- **Scale:** 1:10
- **Product Dimensions:** 14 x 5 x 3 inches
- **Item Weight:** 2.73 pounds
- **Manufacturer:** Jada Toys

- **Frequency:** 2.4 GHz (supports 16+ players at 100 feet range)
- **Power Source (Car):** Rechargeable via integrated USB
- **Power Source (Controller):** 1 AA battery (included)
- **Assembly Required:** No
- **Included Components:** Radio control vehicle, remote controller, AA battery, extra drift tires.
- **Recommended Age:** 8+
