## 3. SETUP GUIDE

### 3.1 Charging the Scanner

The scanner comes with a built-in rechargeable Li-Ion battery. To charge the scanner, simply place it onto the Next Gen Smart Charging Stand. The stand will automatically charge the scanner via its lighting connectors. A full charge typically takes approximately 4 hours.

For long-term battery health, always charge your scanner with a 5V/1A charger. Avoid using fast chargers (like 5V/2A or 9V) to prevent potential battery damage.

## 4. OPERATING INSTRUCTIONS

The scanner supports three primary scan modes:

- **Manual Mode:** Press the trigger to scan each barcode individually.
- **Continuous Mode:** The scanner continuously emits a scan beam, reading barcodes as they pass through the beam.
- **Auto-Sense Mode:** The scanner automatically detects a barcode in its field of view and scans it without requiring a trigger press.

The scanner can decode a wide range of 1D and 2D barcodes, including those on paper, mobile screens, and computer screens. It also features vibration capabilities for confirmation in noisy environments and can decode irregular or damaged barcodes.

The device supports two upload modes:

- **Instant Mode:** Barcodes are instantly uploaded to the connected system upon scanning.
- **Storage Mode / Offline Mode:** Barcodes are stored in the scanner's internal memory (up to 200,000 product codes) and can be uploaded later when connected.

## 5. MAINTENANCE

To ensure the longevity and optimal performance of your ScanAvenger barcode scanner, follow these maintenance guidelines:

- **Cleaning:** Use a soft, dry cloth to clean the scanner's exterior. For the scanning window, use a lint-free cloth and a mild, non-abrasive cleaner if necessary. Avoid harsh chemicals or abrasive materials.
- **Battery Care:** As mentioned in the charging section, always use a 5V/1A charger. Avoid overcharging or completely draining the battery frequently. Store the scanner in a cool, dry place when not in use for extended periods.
- **Physical Protection:** While the scanner has an industrial-grade shock-resistant design (withstanding 2-meter drops), it is always best to handle it with care to prevent unnecessary impacts.
