SETUP INSTRUCTIONS

1. Battery Installation

1. Locate the battery compartments on the back of the clock.
2. Insert one (1) "AA" battery into the compartment designated for clock movement, ensuring correct polarity (+/-).
3. Insert three (3) "AA" batteries into the compartment designated for the smart light sensor, ensuring correct polarity (+/-).
4. Close both battery covers securely.

Note: Batteries are not included with the clock. Use high-quality alkaline batteries for best performance and longevity.

2. Setting the Time

1. Turn the time adjustment knob located on the back of the clock (usually near the clock movement battery compartment) clockwise or counter-clockwise until the hands display the correct time.

2. Avoid moving the clock hands directly to prevent damage to the movement.

3. Mounting the Clock

1. Choose a suitable location on a wall for your clock. Ensure it is a stable surface.
2. Use the included wall hook for easy and secure mounting. Follow the instructions provided with the hook for proper installation.
3. Hang the clock securely on the installed hook.

OPERATING INSTRUCTIONS

Smart Light Sensor Operation

The WallarGe Night Light Wall Clock features an intelligent light sensor that automatically activates the backlight when the ambient light in the room is low, and turns it off when the room is bright. This ensures visibility in the dark without manual intervention.

- To control the night light, use the "BRIGHTNESS" switch on the back of the clock.
- **OFF:** The night light feature is disabled.
- **LOW:** The night light will illuminate at a lower brightness level when the room is dark.
- **HIGH:** The night light will illuminate at a higher brightness level when the room is dark.

Easy Readability

With its 12-inch dial and bold, clear numbers, the WallarGe clock is designed for excellent readability. The large display, combined with the adjustable night light, ensures you can easily tell the time from a distance, whether it's day or night.

Extra Large Number

Regardless of day and night, no matter from any angle,
anyone can easily read the time

MAINTENANCE

- **Cleaning:** To clean the clock, gently wipe the surface with a soft, dry cloth. Do not use abrasive cleaners or solvents, as they may damage the finish or the glass.
- **Battery Replacement:** Replace batteries annually or when the clock movement slows down, or the night light dims

significantly. Always replace all batteries at once with new ones of the same type.

- **Storage:** If storing the clock for an extended period, remove all batteries to prevent leakage and potential damage.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Clock not running or running slowly.	Low or dead clock movement battery. Incorrect battery polarity.	Replace the "AA" battery for the clock movement. Ensure the battery is inserted with correct polarity (+/-).
Night light not illuminating.	Low or dead light sensor batteries. Light sensor switch set to "OFF". Room is not dark enough.	Replace the three "AA" batteries for the light sensor. Set the "BRIGHTNESS" switch to "LOW" or "HIGH". Ensure the room is sufficiently dark for the sensor to activate.
Clock makes a ticking sound.	This clock is designed to be silent. A ticking sound may indicate an issue with the movement or external interference.	Ensure the clock is securely mounted and not vibrating against the wall. If the issue persists, contact customer support.
