Karinear 12-Inch 2-Burner Built-in Electric Cooktop Instruction Manual

Brand: Karinear | Model: KNC-D23002

INTRODUCTION

Thank you for choosing the Karinear 12-Inch 2-Burner Built-in Electric Cooktop. This radiant ceramic cooktop is designed for efficiency and convenience, featuring two independent heating areas and knob controls for precise temperature management. It is suitable for 220-240V hardwired installations and offers various safety features to ensure a secure cooking experience.

Key features include 9 power levels, a residual heat indicator, over-temperature protection, and a durable, easy-to-clean ceramic glass surface. Its compact design makes it ideal for small kitchens or as an auxiliary cooking surface.

IMPORTANT SAFETY INFORMATION

- This appliance must be installed and connected by qualified personnel or technicians. Do not attempt installation or connection yourself.
- The electric ceramic burner turns red cyclically, and the higher the power level, the more often it turns red. This is normal operation and not a malfunction.
- If the glass surface is broken or if you encounter any other problems, please contact Karinear After-Service immediately for assistance.
- The residual heat indicator will illuminate to warn you when the cooktop surface is hot. Do not touch the hot surface to avoid burns.
- The cooktop includes over-temperature protection with an automatic safety shut-off function if the internal temperature becomes too high.
- Knob controls are designed to prevent accidental activation by children or pets, offering a safer alternative to touch screen buttons.

SETUP AND INSTALLATION

The Karinear 12-inch electric cooktop is designed for built-in installation and requires hardwiring to a 220-240V power supply. It does not come with a plug. Ensure the cutout dimensions in your countertop match the product specifications for a proper fit.

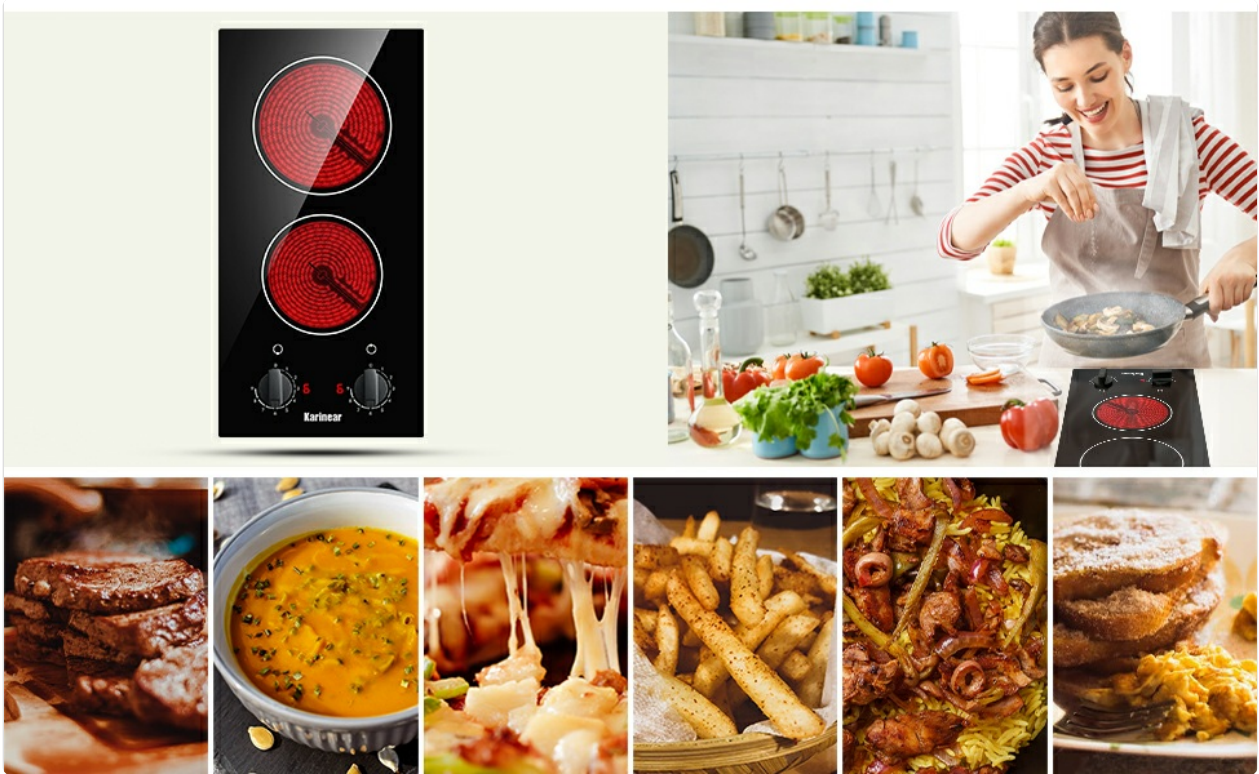

Diagram showing the dimensions and hardwiring connections for the Karinear 12-inch electric cooktop. The cooktop measures 520mm (20.5in) in length, 290mm (11.4in) in width, and 54mm (2.1in) in height. The required cutout dimensions are 490mm (19.3in) in length and 270mm (10.6in) in width. A wiring diagram for a 3-wire cable from home power supply (20A 240V~) is also illustrated.

Mounting brackets and screws are provided for securing the cooktop to your countertop. Additionally, rubber feet are included for optional use if you prefer not to permanently mount the unit or for countertop use.

Karinear 12 Inch Electric Ceramic Cooktop

This image shows the Karinear 12-inch electric cooktop seamlessly integrated into a kitchen countertop, highlighting its space-saving built-in design. The sleek black surface with two circular cooking zones blends well with modern kitchen aesthetics.

OPERATING INSTRUCTIONS

The cooktop features two independent burners, each controlled by a dedicated knob. These knobs allow you to select from 9 power levels, providing versatile heat settings for various cooking needs, from simmering to boiling and frying.

A detailed view of the cooktop's electronic knob controls. Each knob corresponds to a burner and features clear markings for 9 power levels, from 1 to 9, allowing for precise heat adjustment. The simple design is user-friendly.

After use, the residual heat indicator will remain lit until the surface has cooled to a safe temperature. Always observe this indicator to prevent accidental burns.

Video demonstrating the knob controls and heating functionality of the Karinear 12-inch electric ceramic cooktop. It shows how to turn on the cooktop, adjust the heat levels using the knob controls, and demonstrates the heating process of the radiant burners. The video also highlights the residual heat indicator.

This radiant cooktop is compatible with all types of cookware, including aluminum, copper, cast iron, and non-magnetic stainless steel pans, ensuring efficient heating with minimal heat loss.

This image displays the cooktop in use with a pan of meat, emphasizing its safety features. Text overlays indicate 'Overheating protection' and 'Residual Heat Indicator', ensuring user safety during and after cooking.

MAINTENANCE AND CLEANING

The ceramic glass surface of the cooktop is designed for easy cleaning. Simply wipe with a clean, damp cloth once the surface has cooled down. For stubborn stains or spills, use the provided scraper.

A hand is shown wiping the smooth glass surface of the cooktop with a cloth, demonstrating its ease of cleaning. An icon of a scraper is included, indicating that a scraper is provided for maintenance.

TROUBLESHOOTING

If the cooktop is not heating, ensure it is properly hardwired and the power supply is active. If a burner turns red cyclically, this is normal operation, especially at higher power levels, and does not indicate a malfunction. If the residual heat indicator remains on, the surface is still hot; allow it to cool. For any persistent issues or concerns, please refer to the contact information provided for customer support.

PRODUCT SPECIFICATIONS

Feature	Detail
Brand	Karinear
Model Number	KNC-D23002
Installation Type	Built-In
Burner Type	Radiant
Number of Heating Elements	2
Voltage	220-240 Volts (AC)
Wattage	3000 watts
Control Type	Knob Control
Product Dimensions	19.3 x 11.4 x 2.1 inches (490 x 290 x 54 mm)
Material Type	Ceramic Glass
Special Features	Residual Heat Indicator, Over-Temperature Protection, Hardwired Installation
Included Components	Manual, Scraper
