CLEANmaxx CLEANmaxx Automatic Ironing Machine

CLEANmaxx Automatic Drying and Ironing Machine with Steam Function User Manual

Model: CLEANmaxx Automatic Ironing Machine

1. Introduction

The CLEANmaxx Automatic Drying and Ironing Machine with Steam Function is designed to simplify the process of drying and ironing shirts, blouses, T-shirts, and other dryer-suitable garments. This device automatically dries, steams, and irons your clothing, providing a convenient and efficient alternative to traditional ironing methods. It features a balloon body that inflates and applies warmth, along with a steam function for wrinkle removal and refreshing dry outerwear. All operations are managed via an intuitive touchscreen interface.

2. Safety Instructions

- Read all instructions before using the appliance.
- This device is intended for drying, steaming, and ironing textiles such as blouses, shirts, and T-shirts.
- **Do not iron sensitive textiles such as wool or similar materials on this machine.**Always refer to the garment's wash labels for care instructions.
- The device is intended for machine-washed or dry-cleaned laundry.
- Ensure the appliance is placed on a stable, level surface.
- Keep the appliance away from water and other liquids.
- Do not operate the appliance with a damaged cord or plug.
- Unplug the appliance when not in use and before cleaning.
- Keep children and pets away from the appliance during operation.

3. Package Contents

Verify that all components are present in the package:

- 1 x Motor Unit
- 1 x Telescopic Rod with Drop Cover (long)

- 1 x Balloon Body (Nylon, for shirts/blouses)
- 5 x Clips with Integrated Weight
- 1 x Measuring Cup

4. Product Overview

The CLEANmaxx Automatic Drying and Ironing Machine consists of a base motor unit, a telescopic rod, and a balloon body. The motor unit houses the heating and fan components, while the balloon body inflates to shape and dry garments. The touchscreen display on the motor unit allows for easy control of functions.

Figure 1: Front view of the CLEANmaxx Automatic Drying and Ironing Machine with a shirt mounted, illustrating the internal airflow and steam distribution for drying and ironing.

Figure 2: Rear view of the CLEANmaxx Automatic Drying and Ironing Machine, showing the inflated balloon body and indicating the direction of internal airflow.

Figure 3: The adjustable telescopic rod, which allows for varying garment lengths and sizes.

5. Setup

1. **Unpack Components:** Carefully remove all parts from the packaging.
2. **Assemble Telescopic Rod:** Insert the telescopic rod into the motor unit. Ensure it is securely seated.
3. **Attach Balloon Body:** Place the nylon balloon body over the telescopic rod and secure it to the motor unit base. The balloon body is designed for shirts and blouses.
4. **Position Clips:** Attach the clips with integrated weights to the bottom hem of the garment once it is placed on the balloon body. These weights help to stretch the fabric and reduce wrinkles.
5. **Water Tank (for Steam Function):** If using the steam function, fill the water tank (approx. 700 ml capacity) with distilled water using the provided measuring cup. The water tank is typically located within or accessible from the motor unit.
6. **Placement:** Position the assembled unit on a stable, flat surface, ensuring adequate space around it for airflow.

6. Operating Instructions

The CLEANmaxx machine offers two primary functions: drying and ironing, and refreshing with steam. Both are controlled via the touchscreen.

6.1. Drying and Ironing (for damp garments)

1. **Prepare Garment:** After washing, gently wring out the garment to remove excess water. It should be damp, not dripping wet.
2. **Mount Garment:** Carefully pull the shirt or blouse over the balloon body. Ensure the garment is evenly distributed and smooth.
3. **Attach Weights:** Use the provided clips with weights to secure the bottom hem of the garment. This helps to stretch the fabric and prevent wrinkles as it dries.
4. **Set Timer:** Use the touchscreen display to set the desired drying and ironing duration. The balloon body will inflate and provide warmth, drying the garment and smoothing out wrinkles automatically.
5. **Completion:** Once the timer finishes, the machine will stop. Carefully remove the dried and ironed garment.

6.2. Refreshing and Ironing (for dry garments with steam)

1. **Fill Water Tank:** Ensure the water tank is filled with distilled water (approx. 700 ml).
2. **Mount Garment:** Place the dry garment over the balloon body, ensuring it is smooth.
3. **Attach Weights:** Secure the bottom hem with the weighted clips.
4. **Activate Steam Function:** Use the touchscreen to select the steam function and set the desired duration. The machine will generate steam to remove wrinkles and refresh the fabric.
5. **Completion:** After the cycle, remove the refreshed garment.

Figure 4: The machine in operation, demonstrating the steam and airflow within a garment to achieve wrinkle-free results.

Figure 5: Key features of the CLEANmaxx machine: Timer function, 1800 Watt power, universal size compatibility (S-XXL), and a touch display for control.

7. Care and Maintenance

- **Cleaning:** Before cleaning, always unplug the appliance and allow it to cool completely. Wipe the exterior surfaces with a soft, damp cloth. Do not use abrasive cleaners or solvents.
- **Water Tank:** Regularly empty and rinse the water tank, especially if using the steam function frequently. Use distilled water to prevent mineral buildup.
- **Storage:** When not in use, store the appliance in a dry, cool place. The telescopic rod can be adjusted for more compact storage.

8. Troubleshooting

Problem	Possible Cause	Solution

Problem	Possible Cause	Solution
Machine does not turn on.	Not plugged in; power outlet malfunction.	Ensure the power cord is securely plugged into a functional outlet.
Garment is still wrinkled after cycle.	Incorrect garment placement; insufficient cycle time; garment material not suitable.	Ensure garment is smoothly placed and stretched with weights. Increase cycle time. Verify garment care label.
No steam produced.	Water tank empty; steam function not selected.	Fill the water tank with distilled water. Select the steam function on the touchscreen.
Machine is noisy during operation.	Normal fan operation; obstruction in fan.	Some noise is normal due to the fan. If noise is excessive or unusual, check for obstructions or contact support.

9. Specifications

Brand: CLEANmaxx

Model: CLEANmaxx Automatic Ironing Machine

Product Dimensions (L x W x H): 41.2 x 17 x 108 cm

Weight: 4.4 kg

Water Tank Capacity: Approx. 700 ml

Voltage Supply: 220-240 V ~ 50 Hz

Power: 1800 W

Protection Class: II

Protection Class (IPX): IPX1

Material: Nylon (balloon body)

Manufacturer: DS Produkte GmbH

10. Warranty and Support

For warranty information or technical support, please refer to the documentation provided with your purchase or contact the manufacturer directly. Keep your proof of purchase for warranty claims.
