AOC 20-Inch LCD Monitor User Manual

Model: 20

INTRODUCTION

This manual provides comprehensive instructions for the setup, operation, maintenance, and troubleshooting of your AOC 20-Inch LCD Monitor (Model: 20). Please read this manual thoroughly before using the monitor to ensure proper functionality and to maximize its lifespan. This product is a renewed item, meaning it has been inspected and restored to working condition.

SAFETY INFORMATION

Observe the following safety precautions to prevent damage to the monitor and to ensure your personal safety:

- Do not expose the monitor to rain or moisture.
- Do not block ventilation openings.
- Use only the power cord and adapter provided or specified by the manufacturer.
- Place the monitor on a stable, flat surface.
- Disconnect the power plug from the outlet if the monitor will not be used for an extended period.
- Refer all servicing to qualified service personnel.

PACKAGE CONTENTS

Carefully unpack the box and ensure all items are present. If any items are missing or damaged, contact your retailer immediately.

- AOC 20-Inch LCD Monitor
- Power Cable
- VGA Cable
- Driver CD (may not be included with renewed units, drivers are often available online)

Figure 3: Included accessories: power cable, VGA cable, and driver CD.

SETUP

1. Unpacking and Placement

Carefully remove the monitor from its packaging. Place the monitor on a stable, flat surface, such as a desk or table, ensuring adequate ventilation around the unit. Avoid placing it near heat sources or in direct sunlight.

Figure 4: Angled view of the AOC monitor, suitable for placement reference.

2. Connecting the Cables

Connect the necessary cables to the monitor and your computer. Ensure all connections are secure.

- Power Connection:** Connect the power cable to the monitor's power input and then to a grounded electrical outlet.
- Video Connection:** Connect one end of the VGA cable to the VGA port on your computer's graphics card and the other end to the VGA input port on the monitor. If your computer supports other video inputs (e.g., DVI, HDMI), you may use a compatible cable (not included) if the monitor also supports it.
- USB Connection (Optional):** If your monitor has a USB hub, connect a USB upstream cable (not included) from your computer to the monitor's USB upstream port to enable the monitor's USB ports.

OPERATING THE MONITOR

Power On/Off

Press the power button located on the front or bottom bezel of the monitor to turn it on or off. The power indicator light will illuminate when the monitor is on.

On-Screen Display (OSD) Menu

The monitor features an On-Screen Display (OSD) menu for adjusting various settings. Use the physical buttons on the monitor's bezel to navigate and select options within the OSD menu.

Common OSD Settings:

- Brightness/Contrast:** Adjust the overall luminance and contrast of the display.
- Input Select:** Manually switch between available video input sources (e.g., VGA).

- **Image Settings:** Fine-tune image quality, including sharpness, color temperature, and gamma.
- **OSD Settings:** Adjust the OSD menu's position, transparency, and timeout.
- **Power Saving:** Enable or disable power-saving features. This monitor features a 50% power saving function and an automatic power-off timer.

Optimal Resolution

For the best visual experience, set your computer's display resolution to the monitor's native resolution of **1600 x 900**. The monitor has a **16:9 widescreen** aspect ratio.

MAINTENANCE

Cleaning the Monitor

To maintain the clarity and appearance of your monitor, follow these cleaning guidelines:

- Always turn off the monitor and unplug the power cord before cleaning.
- Use a soft, lint-free cloth slightly dampened with water or a non-abrasive screen cleaner.
- Do not spray cleaner directly onto the screen. Apply it to the cloth first.
- Avoid using benzene, thinner, ammonia, or abrasive cleaners, as these can damage the screen or casing.

TROUBLESHOOTING

If you encounter issues with your AOC monitor, refer to the following common problems and solutions:

Problem	Possible Cause / Solution
No image on screen	<p>Ensure the power cable is securely connected and the monitor is turned on.</p> <p>Check if the video cable (VGA) is properly connected to both the monitor and the computer.</p> <p>Verify that the correct input source is selected in the OSD menu.</p> <p>Test with another computer or video source if possible.</p>
Image is blurry or distorted	<p>Adjust the resolution on your computer to the monitor's native resolution (1600 x 900).</p> <p>Run the auto-adjustment function in the OSD menu (if available).</p> <p>Check the video cable for damage or loose connections.</p>
Screen flickering	<p>Ensure the video cable is securely connected.</p> <p>Check for strong electromagnetic interference from other devices.</p> <p>Adjust the refresh rate on your computer's display settings.</p>
Buttons not responding	<p>Unplug the monitor's power cable, wait 30 seconds, and plug it back in.</p> <p>Ensure no objects are pressing against the buttons.</p>

SPECIFICATIONS

Feature	Detail
