1. INTRODUCTION

This user manual provides comprehensive instructions for the ZEFAL Arctica 750ml Insulated Bicycle Bottle. Please read this manual carefully before using the product to ensure proper function, longevity, and safety. This bottle is designed to keep your liquids at an optimal temperature during cycling activities.

2. PRODUCT OVERVIEW

The ZEFAL Arctica 750ml Insulated Bicycle Bottle is a high-quality, insulated sports bottle designed for cyclists. It features an odorless and leak-proof design, made from BPA-free plastic, ensuring safe and clean hydration on the go.

2.1 Components

- 1 x ZEFAL Arctica 750ml Insulated Bicycle Bottle (Red)

2.2 Product Features

- **Insulated Design:** Helps maintain liquid temperature (hot or cold) for extended periods.
- **Odorless Material:** Ensures no plastic taste or smell contaminates your drink.
- **Leak-Proof Cap:** Designed to prevent spills and leaks during transport and use.
- **BPA-Free:** Made from safe, non-toxic materials.
- **750ml Capacity:** Ideal volume for cycling and other sports activities.

2.3 Product Images

A clear, cylindrical insulated water bottle with a black screw-on lid. The bottle has a textured design with a wavy pattern in the middle and a red and white geometric pattern at the bottom. The brand name 'ZEFAL' is printed in bold black letters near the top. Below it, 'ARCTICA' is printed in a larger, bold black font, with 'INSULATED' above it. Further down, it says '- BPA Free -', '750ml', and 'Made in France'.

Figure 6: The ZEFAL Arctica bottle mounted on a white bicycle, showcasing its appearance on a lighter frame.

Figure 7: A display of three ZEFAL Arctica bottles, illustrating the available color variations: red, grey, and blue.

3. SETUP

Before first use, it is recommended to clean the bottle thoroughly. Follow these steps:

1. Unscrew the cap from the bottle body.
2. Wash both the bottle and the cap with warm water and a mild dish soap.
3. Rinse thoroughly to remove all soap residue.
4. Allow all parts to air dry completely before reassembling or storing.

The bottle is designed to fit standard bicycle bottle cages. Simply slide the bottle into your bike's bottle cage until it is securely seated.

4. OPERATION

4.1 Filling the Bottle

1. Unscrew the cap.
2. Fill the bottle with your desired liquid. For optimal insulation, pre-chill or pre-warm the bottle with water before adding your beverage.
3. Do not overfill. Leave a small air gap at the top.
4. Securely screw the cap back onto the bottle, ensuring it is tightened to prevent leaks.

4.2 Drinking from the Bottle

The bottle features a pull-out nozzle for easy drinking. To drink, pull the nozzle upwards with your teeth or fingers. Squeeze the bottle body to dispense liquid. Push the nozzle back down to seal the bottle and prevent leaks when not in use.

4.3 Insulation Performance

The Arctica bottle's insulated design helps maintain the temperature of your beverage. For cold drinks, consider adding ice cubes. For hot drinks, ensure the liquid is not boiling hot to avoid pressure buildup or damage to the bottle. The insulation performance may vary based on ambient temperature and initial liquid temperature.

5. MAINTENANCE

Proper cleaning and maintenance will extend the life of your ZEFAL Arctica bottle and ensure hygienic use.

5.1 Cleaning Instructions

- **Hand Wash Only:** The bottle and cap should be washed by hand. Do not place in a dishwasher, as high temperatures can damage the insulation and plastic.
- Use warm water and a mild detergent. A bottle brush can be used to clean the interior thoroughly.
- Pay special attention to cleaning the nozzle and cap assembly to prevent residue buildup.
- Rinse all components thoroughly with clean water.
- Allow the bottle and cap to dry completely, preferably disassembled, to prevent mold or odor development.

5.2 Storage

Store the bottle with the cap unscrewed or loosely placed to allow air circulation and prevent odors.

6. TROUBLESHOOTING

Problem	Possible Cause	Solution
Bottle is leaking	Cap not tightened properly; Nozzle not fully closed; Damaged seal or nozzle.	Ensure the cap is screwed on tightly. Push the nozzle down firmly until it clicks into place. Inspect the cap and nozzle for any visible damage or wear; replace if necessary.
Unpleasant odor or taste	Improper cleaning; Residue buildup; Stored with moisture inside.	Clean the bottle thoroughly as per maintenance instructions, paying attention to all parts. Ensure the bottle is completely dry before storage. For persistent odors, a mixture of baking soda and water can be used for soaking.
Liquid not staying cold/hot	Extreme ambient temperatures; Bottle not pre-chilled/warmed; Cap not sealed properly.	Pre-chill or pre-warm the bottle before filling. Ensure the cap is tightly sealed. Note that insulation performance is not absolute and will degrade over time, especially in extreme conditions.

7. SPECIFICATIONS

Feature	Detail
Manufacturer	ZEFAL
Model Number	1673
Product Dimensions (L x W x H)	5 x 15 x 15 cm
Weight	120 grams
Capacity	750 ml
Color	Red
Material	Plastic
Special Feature	Isothermal (Insulated)
Care Instructions	Hand wash only
Country of Origin	China
