## 4. SETUP

---

Before first use, ensure the hair dryer is clean and free from any packaging materials.

1. **Attach an Accessory:** To attach a concentrator nozzle or diffuser, align the accessory with the front barrel of the hair dryer and push it firmly into place. Ensure it is securely seated before use.
2. **Remove an Accessory:** To remove, gently pull the accessory straight off the barrel. Allow the dryer to cool completely before changing accessories if it has been in use.
3. **Power Connection:** Plug the power cord into a standard electrical outlet. Ensure the outlet voltage matches the dryer's specifications (120V AC, 60Hz for North America).

## 5. OPERATING INSTRUCTIONS

---

The hair dryer features intuitive controls for power, speed, and temperature.

1. **Power On/Off:** Locate the power switch on the handle. Slide it to the 'ON' position to start the dryer and to 'OFF' to turn it off.
2. **Adjusting Speed:** The speed switch offers two settings: 'LOW' for gentle drying and 'HIGH' for faster drying. Select the desired speed based on your hair type and styling needs.
3. **Adjusting Temperature:** The temperature switch provides four heat settings: 'COOL', 'LOW', 'MEDIUM', and 'HIGH'. Choose the appropriate heat level for your hair. Lower temperatures are ideal for fine or damaged hair, while higher temperatures are suitable for thick or coarse hair.
4. **Using the Cool Shot Button:** Press and hold the blue 'Cool Shot' button to deliver a burst of cool air. This helps to set your hairstyle and add shine. Release the button to return to the selected heat setting.
5. **Styling with Attachments:**
  - **Concentrator Nozzles:** Use these to direct airflow for precise styling, smoothing, or

straightening sections of hair.

- **Diffuser:** Ideal for enhancing natural curls and waves, the diffuser disperses air gently to reduce frizz and add volume.

## 6. MAINTENANCE

---

Regular maintenance ensures optimal performance and extends the life of your hair dryer.

1. **Cleaning the Lint Filter:** The hair dryer features a removable lint filter at the rear. Regularly clean this filter to prevent lint and dust buildup, which can restrict airflow and cause overheating. To clean, twist or pull off the filter cover, remove any accumulated lint with a brush or cloth, and then reattach the cover securely.
2. **General Cleaning:** Wipe the exterior of the hair dryer with a soft, damp cloth. Do not use abrasive cleaners or solvents. Ensure the dryer is unplugged and completely dry before storage or next use.
3. **Storage:** Store the hair dryer in a cool, dry place. Do not wrap the cord tightly around the appliance, as this can damage the cord.

## 7. TROUBLESHOOTING

---

If you encounter issues with your hair dryer, refer to the following common solutions:

Problem	Possible Cause	Solution
Dryer does not turn on	No power supply; Faulty outlet; Dryer switch off	Check power cord connection; Test outlet with another appliance; Ensure power switch is 'ON'
Low airflow or overheating	Blocked air intake/filter	Unplug dryer and clean the removable lint filter (refer to Maintenance section)
Unusual noise or smell	Internal issue; Foreign object	Immediately unplug the dryer. Do not use. Contact customer support.

If the problem persists after attempting these solutions, discontinue use and contact customer support.
