## D-Link COVR-1100

# D-Link COVR 1100 AC1200 Whole Home EasyMesh Wi-Fi Router User Manual

Model: COVR-1100

## 1. INTRODUCTION

This manual provides detailed instructions for setting up, operating, and maintaining your D-Link COVR 1100 AC1200 Whole Home EasyMesh Wi-Fi Router. The COVR-1100 is designed to provide seamless, high-speed Wi-Fi coverage throughout your home.

### Key Features:

- AC1200 Mbps WAVE 2 Dual Band Wi-Fi
- Certified EasyMesh for whole-home coverage
- Supports 802.11 a/b/g/n/ac standards
- Speeds of 300 Mbps on 2.4 GHz and 867 Mbps on 5 GHz
- Triple Play VLAN for multiple service support
- Single SSID for a unified Wi-Fi network
- Two Gigabit Ethernet ports per unit
- Voice assistant compatibility (Google Assistant & Alexa)
- Easy setup via D-Link Wi-Fi Mobile App or Web GUI
- Profile-based parental controls
- Expandable mesh network with additional COVR-1100 units

## 2. PACKAGE CONTENTS

Verify that your package contains the following items:

- 1 x D-Link COVR-1100 Router Unit
- 1 x Power Adapter
- 1 x Ethernet Cable
- 1 x Quick Install Card
- Device Setup Information

- Voice Control Information

### 3. PHYSICAL OVERVIEW

The D-Link COVR-1100 unit features a compact design with essential ports and indicators for network connectivity.

*Figure 1: Front view of the D-Link COVR-1100 router, showcasing its minimalist white design.*

#### Ports and Indicators:

- **Power Port:** Connects to the included power adapter.
- **WAN/LAN Gigabit Ethernet Ports:** Two ports for connecting to your modem or wired devices. These ports automatically detect WAN or LAN function.
- **Reset Button:** Used to restore the device to factory default settings.
- **LED Indicator:** Provides status information (e.g., power, internet connectivity, mesh status).

## 4. SETUP INSTRUCTIONS

Follow these steps to set up your D-Link COVR-1100 router.

### 4.1 Initial Setup (Single Unit)

1. **Unpack:** Carefully remove all items from the packaging.
2. **Position:** Place the COVR-1100 unit in a central location within your home, away from obstructions and other electronic devices that may cause interference.
3. **Connect Power:** Connect the power adapter to the COVR-1100's power port and plug it into a power outlet. Wait for the LED indicator to turn solid white (or blue, depending on the specific model's indicator behavior, refer to Quick Install Card).
4. **Connect to Modem:** Connect one end of the included Ethernet cable to the WAN/LAN port on the COVR-1100 and the other end to your internet modem's LAN port.
5. **Download App:** Download the D-Link Wi-Fi app from your mobile device's app store (App Store for iOS, Google Play Store for Android).
6. **Launch App & Follow Prompts:** Open the D-Link Wi-Fi app and follow the on-screen instructions to set up your new Wi-Fi network, including creating a Wi-Fi name (SSID) and password.
7. **Alternative Web Setup:** If you prefer, you can connect a computer to the COVR-1100 via Ethernet or its default Wi-Fi network (details on Quick Install Card) and navigate to <http://covr.local/> or the IP address provided in the Quick Install Card to access the web-based setup wizard.

### 4.2 Expanding Your Mesh Network (Multiple Units)

The COVR-1100 supports EasyMesh, allowing you to add additional units to expand your Wi-Fi coverage. You can add up to 4 COVR-1100 units to create a seamless whole-home mesh network.

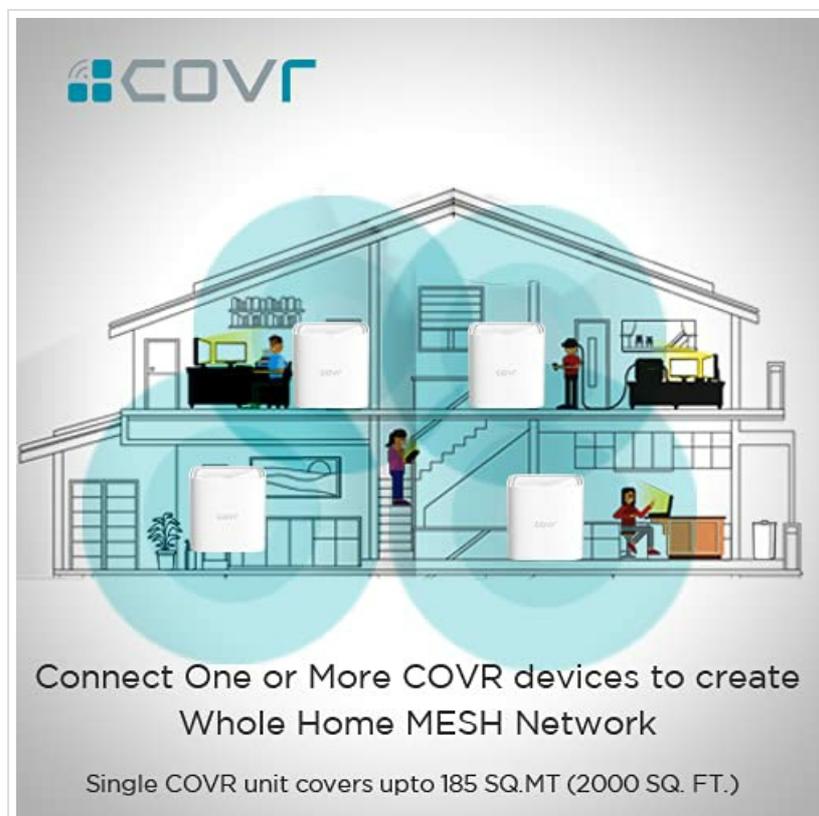

Figure 2: Illustration of multiple D-Link COVR-1100 units deployed to create a whole-home mesh Wi-Fi network.

1. **Power On:** Place the additional COVR-1100 unit(s) in areas requiring extended coverage and connect them to power outlets.

2. **Add via App:** Open the D-Link Wi-Fi app, navigate to the mesh network settings, and follow the instructions to add new COVR units to your existing mesh network. The app will guide you through the pairing process.
3. **Placement:** Ensure optimal placement of additional units to maintain strong signal strength between them and the primary COVR unit for seamless roaming.

Figure 3: A diagram illustrating how a single COVR-1100 unit provides Wi-Fi coverage across a large area, and how multiple units can extend this coverage throughout a multi-story home.

## 5. OPERATING INSTRUCTIONS

### 5.1 Connecting Devices

- **Wireless Devices:** Search for your Wi-Fi network name (SSID) on your smartphone, tablet, or computer and enter the password you created during setup.
- **Wired Devices:** Connect devices such as smart TVs, gaming consoles, or desktop computers to the available Gigabit Ethernet ports on the COVR-1100 unit using an Ethernet cable.

### 5.2 Parental Controls

The D-Link Wi-Fi app allows you to set up profile-based parental controls to manage internet access for specific devices or users. This includes scheduling internet access and blocking certain websites.

- Open the D-Link Wi-Fi app.
- Navigate to the Parental Controls section.
- Create profiles for family members and assign devices.
- Configure access schedules and content filters as needed.

### 5.3 Voice Control

The COVR-1100 is compatible with Google Assistant and Amazon Alexa. You can use voice commands to manage certain router functions.

- Ensure your voice assistant device is set up and connected to your COVR Wi-Fi network.
- Enable the D-Link skill/action in your Google Home or Amazon Alexa app.
- Follow the app instructions to link your D-Link account.
- Refer to the voice control information provided in your package for specific commands.

## 6. MAINTENANCE

---

### 6.1 Firmware Updates

D-Link regularly releases firmware updates to improve performance, add features, and enhance security. It is recommended to keep your router's firmware up to date.

- Check for updates via the D-Link Wi-Fi app or the web-based management interface.
- Follow the on-screen instructions to perform firmware updates. Do not power off the device during an update.

### 6.2 Factory Reset

A factory reset will erase all custom settings and restore the router to its original factory defaults. This can be useful for troubleshooting persistent issues or when reconfiguring the device.

- With the router powered on, use a paperclip or similar pointed object to press and hold the Reset button (usually located on the back or bottom of the unit) for approximately 10 seconds.
- Release the button when the LED indicator changes color or flashes.
- The router will restart with factory default settings. You will need to reconfigure it as if it were a new device.

## 7. TROUBLESHOOTING

---

This section addresses common issues you might encounter with your COVR-1100 router.

### 7.1 No Internet Connection

- **Check Cables:** Ensure all Ethernet cables are securely connected to the COVR-1100 and your modem.
- **Modem Status:** Verify that your internet modem is working correctly and has an active internet connection.
- **Restart Devices:** Power cycle your modem, then your COVR-1100 router. Wait a few minutes for each device to fully boot up.
- **ISP Settings:** Confirm that your Internet Service Provider (ISP) settings (e.g., PPPoE username/password, DHCP) are correctly configured in the router.

### 7.2 Weak Wi-Fi Signal or Dead Zones

- **Router Placement:** Relocate the COVR-1100 to a more central location, away from walls, large metal objects, and other electronics that may cause interference.
- **Add COVR Units:** If you have a large home, consider adding additional COVR-1100 units to expand your mesh network coverage.
- **Interference:** Avoid placing the router near microwave ovens, cordless phones, or Bluetooth devices.

### 7.3 Cannot Access Router Settings

- **Correct Address:** Ensure you are using the correct web address (<http://covr.local/>) or IP address.
- **Network Connection:** Verify your device is connected to the COVR-1100's Wi-Fi network or via an Ethernet cable.
- **Browser Cache:** Clear your web browser's cache and cookies, or try a different browser.

- **Factory Reset:** If all else fails, perform a factory reset (see Section 6.2) and reconfigure the router.

## 8. SPECIFICATIONS

Feature	Detail
Brand	D-Link
Model Number	COVR-1100
Wireless Standard	802.11a/b/g/n/ac
Frequency Band Class	Dual-Band (2.4 GHz & 5 GHz)
Wireless Speed	AC1200 (300 Mbps on 2.4 GHz, 867 Mbps on 5 GHz)
Ethernet Ports	2 x Gigabit WAN/LAN Auto-Sensing Ports
Antennae	2 Internal Antennas
Dimensions (LxWxH)	11.8 x 12.1 x 17 cm
Item Weight	470 g
Connectivity Type	Wi-Fi
Special Features	EasyMesh, MU-MIMO, Voice Control Compatible (Google Assistant & Alexa), Parental Controls, Access Point Mode
Operating System Compatibility	Windows (for web interface access), iOS/Android (for D-Link Wi-Fi App)

## 9. WARRANTY AND SUPPORT

### 9.1 Warranty Information

The D-Link COVR-1100 router comes with a **3-year brand warranty** from the date of purchase. Please retain your proof of purchase for warranty claims. The warranty covers manufacturing defects under normal use conditions.

### 9.2 Technical Support

For further assistance, technical support, or to report issues not covered in this manual, please visit the official D-Link support website or contact their customer service. Contact details can typically be found on the D-Link website or on the product packaging.

**D-Link Support Website:** [www.dlink.com/support](http://www.dlink.com/support) (Please replace with the specific regional support link if available)

### TECHNICAL COMPLIANCE STATEMENT

This is to certify that the product listed in follows was (were) tested in the BTL EMC Laboratory to comply with below FCC official limits.

Equipment 1) AC1200 Dual Band Mesh Wi-Fi Router  
 2) AC1200 Dual Band Whole Home Mesh Wi-Fi Router  
 Model Name AC1200 Dual Band Mesh Wi-Fi Router: COVR-1100  
 Brand Name D-Link  
 Applicant D-Link Corporation  
 Address 17559M, Hermann,Fountain Valley, California, United States 92718

The test data, data evaluation, and equipment configuration contained in our test reports above was (were) obtained utilizing the test procedures, test instruments, test sites that has been accredited according to the ISO/IEC 17025 quality accreditation standard and technical standards. The test data contained in the referenced test report is applicable only to the EUT sample and the FCC tested.
