JEWHITENY 120W UV LED Nail Lamp

JEWHITENY 120W UV LED Nail Lamp Instruction Manual

Model: 120W UV LED Nail Lamp

INTRODUCTION

The JEWHITENY 120W UV LED Nail Lamp is designed for efficient and fast curing of gel nail polishes. Featuring 54 durable light beads and a dual optical wavelength (365nm+405nm), this lamp is suitable for various gel types including LED gel, builder gel, acrylic gel, magnetic gel, and gem gel. Its smart sensor and multiple timer settings provide a convenient and professional nail art experience for both home and salon use.

Key Features:

- **120W High Power:** Dries gel nail polish quickly, up to 60-85% faster than other high-power lamps.
- **Smart Sensor:** Infrared sensors automatically turn the lamp on or off when hands or feet are inserted or removed.
- **54 Durable Light Beads:** Utilizes dual optical wavelength (365nm+405nm) for effective curing of all gel types.
- **Time-Saving:** Shortens curing time by up to 80% compared to other LED nail lamps.
- **Versatile Curing:** Cures almost all nail gel & LED gel nail polishes.

SAFETY INFORMATION

- Read all instructions before using the appliance.
- Keep the appliance away from water or other liquids.
- Do not use the lamp if the power cord or plug is damaged.
- Avoid direct eye exposure to the UV/LED light.
- Unplug the device when not in use or before cleaning.
- This appliance is for indoor use only.
- Keep out of reach of children.

PACKAGE CONTENTS

- 1 x JEWHITENY 120W UV LED Nail Lamp
- 1 x US Plug Power Adapter

PRODUCT OVERVIEW

Simple Operation With Timer Design And Display

Convenient timing curing design and no need to view time

10S

For thin gel polish

30S

For regular color

60S

For dark color or
thick gel polish

99S

For painless low
heat mode

Hands in, light on

Smart Sensor

It automatically starts once you put in your hands
making it easier to use

Hands out, light off

Image 4: Demonstration of the smart sensor feature. When a hand is placed inside, the lights turn on automatically. When the hand is removed, the lights turn off, simplifying the curing process.

Also ideal for pedicure use.
Removable bottom tray--easy to use and clean

Image 5: The nail lamp features a removable bottom tray, making it easy to use for pedicures and simplifying cleaning.

SETUP

1. Unpack the JEWHITENY 120W UV LED Nail Lamp and its accessories from the packaging.
2. Place the nail lamp on a stable, flat surface.
3. Connect the US Plug Power Adapter to the DC input port on the back of the lamp.
4. Plug the power adapter into a suitable electrical outlet. The digital display will light up, indicating the lamp is ready for use.

OPERATING INSTRUCTIONS

Using the Smart Sensor:

The lamp is equipped with an infrared smart sensor for automatic operation. Simply slide your hand or foot into the lamp, and the UV/LED lights will turn on automatically. The timer will begin counting up from 0. When you remove your hand or foot, the lights will turn off.

Using Timer Settings:

For specific curing times, you can use the preset timer buttons located on the top of the lamp:

- **10s Button:** Press for 10 seconds of curing, ideal for thin gel polish.
- **30s Button:** Press for 30 seconds of curing, suitable for regular color gel polish.
- **60s Button:** Press for 60 seconds of curing, recommended for dark color or thick gel polish.
- **99s Button (Low Heat Mode):** Press for 99 seconds of curing. This mode gradually increases power over time to eliminate pain caused by curing gels, especially useful for sensitive nails or builder gels.

Once a timer button is pressed, the digital display will count down the selected time. The lamp will automatically turn off when the countdown is complete.

Pedicure Use:

To use the lamp for pedicures, gently pull the removable bottom tray outwards to detach it. Place the lamp over your foot for curing. Reattach the tray by sliding it back into place until it clicks securely.

MAINTENANCE

- **Cleaning:** Ensure the lamp is unplugged before cleaning. Use a soft, dry cloth to wipe the exterior. For the interior, a slightly damp cloth can be used, but avoid getting water into electrical components.
- **Storage:** Store the lamp in a cool, dry place away from direct sunlight when not in use.
- **Bulb Replacement:** The 54 UV/LED light beads are designed for a long lifespan (up to 50,000 hours) and are not user-replaceable.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Lamp does not turn on.	Power adapter not connected properly or no power from outlet.	Check if the power adapter is securely plugged into both the lamp and the electrical outlet. Test the outlet with another device.
Gel polish is not curing properly.	Incorrect curing time, too thick gel layer, or incompatible gel polish.	Ensure sufficient curing time (refer to gel polish instructions). Apply thinner coats of gel. Verify that your gel polish is compatible with UV/LED lamps.
Smart sensor not activating.	Obstruction of the sensor or hand/foot not fully inserted.	Ensure nothing is blocking the infrared sensors. Place your hand or foot fully into the lamp's opening.

SPECIFICATIONS
