2. WHAT IS ESS60?

ESS60, or Carbon 60, is recognized as one of the most powerful antioxidants ever discovered, earning it a place among the most significant chemical breakthroughs of the century. This remarkable molecule is composed of 60 carbon atoms arranged in a unique hollow structure that resembles a soccer ball. Known as a "free radical sponge," ESS60 stands out because it is hundreds of times more effective than traditional antioxidants. Unlike typical antioxidants, ESS60 has the ability to "reset" itself, continuously neutralizing free radicals without losing potency. Its extraordinary capabilities make it a compelling area of research in both health and materials science.

6. STORAGE AND MAINTENANCE

To maintain the quality and potency of your C60 Evo ESS60 in Extra Virgin Olive Oil, please follow these storage guidelines:

- Store in a cool, dark place away from direct sunlight.
- Ensure the cap is tightly sealed after each use to prevent oxidation.
- Do not refrigerate, as this may cause the olive oil to solidify, though it will return to liquid at room temperature without affecting quality.

The product is manufactured with care, stirred for 3 weeks at room temperature in the dark to become fully saturated, without any light or oxidation.
