## 6. TROUBLESHOOTING

If you encounter any issues with your trolley, refer to the following common solutions:

Problem	Possible Cause	Solution
Trolley is difficult to pull or push.	Wheels are obstructed or damaged.	Check wheels for debris (hair, string) and remove. Ensure wheels rotate freely. If damaged, contact support.
Trolley feels unstable.	Load is unevenly distributed or exceeds capacity.	Distribute weight evenly in the bag. Do not exceed the 30kg weight limit. Ensure the frame is fully unfolded and locked.
Bag does not stay securely on the frame.	Bag not properly attached or fasteners are loose.	Ensure the bag's straps or fasteners are correctly engaged with the frame.
