SETUP INSTRUCTIONS

Follow these steps to connect your ONIKUMA K8 Gaming Headset to your device.

General Connection

1. Connect the 3.5mm audio jack from the headset into the corresponding audio port on your device (PC, console controller, mobile phone, etc.).
2. For RGB lighting, plug the USB connector into an available USB port on your device or a USB power adapter.

Platform-Specific Setup

- **PC/Mac:** Connect the 3.5mm jack to the audio output port and the USB for lighting. If your PC has separate microphone and headphone jacks, use the included Y-splitter cable (if applicable) to connect the 3.5mm jack to both ports.

- **PlayStation 4 (PS4):** Plug the 3.5mm jack into the controller's headset port. Go to Settings > Devices > Audio Devices > Output to Headphones > All Audio.

- **Xbox One:** For new Xbox One controllers with a 3.5mm jack, plug the headset directly into the controller. For older Xbox One controllers without a 3.5mm jack, a Microsoft Stereo Headset Adapter (not included) is required.

- **Nintendo Switch:** Plug the 3.5mm jack into the console's audio port.
- **Mobile Devices (iOS/Android):** Plug the 3.5mm jack directly into your phone or tablet's audio port.

OPERATING INSTRUCTIONS

Volume Control

The headset features an in-line control unit on the cable. Use the **volume adjustment wheel** to increase or decrease the audio output level.

Microphone Usage

- **Mute/Unmute:** Use the **microphone switch** on the in-line control unit to toggle the microphone on (ON) or off (OFF).
- **Positioning:** Adjust the flexible microphone boom to position the microphone optimally near your mouth for clear voice pickup. The microphone is 360° rotatable.

RGB Lighting

The RGB lighting is powered via the USB connection. Once the USB is plugged in, the headset's LED lights will illuminate. There is a dedicated **Light/Volume switch** on the in-line control unit to turn the lighting on or off, independent of the volume.

MAINTENANCE

Proper care will extend the life of your headset.

- **Cleaning:** Use a soft, dry cloth to wipe down the headset. Do not use harsh chemicals or abrasive cleaners. For earmuffs, gently wipe with a damp cloth if necessary, and allow to air dry completely.
- **Storage:** Store the headset in a cool, dry place away from direct sunlight and extreme temperatures. Avoid tangling the cables.
- **Handling:** Do not pull on the cables to disconnect the headset. Always grasp the plug firmly. Avoid dropping or subjecting the headset to strong impacts.

TROUBLESHOOTING

If you encounter issues with your headset, refer to the following common solutions:

Problem	Possible Solution
No sound from headset	Ensure the 3.5mm audio jack is fully inserted into the device. Check the volume wheel on the in-line control and your device's volume settings. Verify that the headset is selected as the default audio output device in your system settings (PC/console). Test the headset on another device to rule out device-specific issues.
Microphone not working	Ensure the microphone switch on the in-line control is set to ON. Check your device's privacy settings to ensure microphone access is granted. Verify that the headset microphone is selected as the default input device in your system settings. For PC, ensure the Y-splitter cable is correctly connected if your PC has separate audio/mic ports.
RGB lighting not working	Ensure the USB cable is securely plugged into a working USB port. Check the Light/Volume switch on the in-line control to ensure it is turned on. Try a different USB port or power source.
