## SETUP

---

1. **Unpack:** Carefully remove the Anker PowerExtend USB 2 mini from its packaging.
2. **Placement:** Choose a suitable location for the power strip. The 8ft cord provides ample length, and the 90-degree flat plug allows for discreet placement behind furniture or in tight spaces.

3. **Connect to Power:** Plug the power strip's flat plug into a standard wall outlet. Ensure the connection is secure.

The 8ft cable and flat plug offer flexible placement options.

## OPERATING INSTRUCTIONS

---

Once the Anker PowerExtend USB 2 mini is plugged into a wall outlet, it is ready for use.

- **Using AC Outlets:** Plug your electronic devices directly into the two AC outlets. Ensure the total power

consumption of all connected devices does not exceed the power strip's maximum rating.

- **Using USB Charging Ports:** Connect your USB-powered devices (e.g., smartphones, tablets) to the two USB-A ports using their respective charging cables. The PowerIQ technology will automatically detect your device and deliver the fastest possible charge.

**Important Notes:**

- The two USB ports share a maximum 12W output. Charging multiple high-power USB devices simultaneously may result in slower charging speeds for each device.
- The USB ports support an input voltage of 100-240V~50/60Hz, making them suitable for worldwide travel.

## MAINTENANCE

---

To ensure the longevity and optimal performance of your Anker PowerExtend USB 2 mini, follow these maintenance guidelines:

- **Cleaning:** Disconnect the power strip from the wall outlet before cleaning. Use a soft, dry cloth to wipe the exterior.

Do not use liquid cleaners or aerosols.

- **Storage:** When not in use, store the power strip in a cool, dry place away from direct sunlight and extreme temperatures.
- **Inspection:** Periodically inspect the cord and plug for any signs of damage. If any damage is found, discontinue use and contact customer support.

## TROUBLESHOOTING

Problem	Possible Cause	Solution
No power from AC outlets or USB ports.	Power strip not properly plugged in; wall outlet is not active.	Ensure the power strip is securely plugged into a live wall outlet. Test the wall outlet with another device.
USB devices charging slowly.	Total output of USB ports (12W) is being shared by multiple devices; device requires higher power input.	Try charging one USB device at a time. Ensure your device's charging requirements are within the 12W shared output.
Power strip feels warm during use.	Normal operation under load; excessive load.	A slight warmth is normal. If the device becomes excessively hot, disconnect all devices immediately and reduce the load. Ensure proper ventilation.
Device not recognized by USB port.	Faulty USB cable; device compatibility issue.	Try a different USB cable. Ensure your device is compatible with standard USB-A charging.
