

## SofaBaton U1

# SofaBaton U1 Universal Remote Control

Your Guide to Seamless Home Entertainment Control

## INTRODUCTION

The SofaBaton U1 is a versatile universal remote control designed to simplify your home entertainment experience by consolidating control of up to 15 devices into a single, intuitive unit. It supports a vast database of over 500,000 devices from more than 6,000 brands, ensuring compatibility with most of your existing IR and Bluetooth-enabled equipment.

With its user-friendly smartphone application, OLED display, and customizable features, the U1 remote aims to replace the clutter of multiple remotes with a single, powerful solution.

## Key Features

- **Extensive Device Compatibility:** Control up to 15 entertainment devices, including TVs, Blu-ray players, set-top boxes, projectors, and stereo systems. Compatible with over 500,000 devices from 6,000+ brands.
- **IR and Bluetooth Support:** Seamlessly integrates with both infrared (IR) and Bluetooth-enabled devices. *Note: Wi-Fi devices are not supported.*
- **Smartphone APP Integration:** Easy setup and customization through the dedicated SofaBaton APP, available for both iOS and Android.
- **Macro Programming:** Program up to 10 commands into a single button, allowing for complex sequences with one press (for infrared devices only).
- **OLED Display and Scroll Wheel:** An intuitive OLED screen displays device names, and a scroll wheel allows for quick switching between paired devices. The screen lights up upon interaction and can be configured for brightness and dormant time.
- **Real-time Database Updates:** The device database is continuously updated to ensure compatibility with the latest entertainment equipment.
- **Ergonomic Design:** Lightweight and designed for comfortable handling.

# Powerful Cloud Code Database

Compatible with 500,000+ devices of 6,000+ brands

## PACKAGE CONTENTS

Please ensure all items are present in your package:

- SofaBaton U1 Universal Remote Control
- 2 x AA Batteries
- User Manual (this document)

## SETUP GUIDE

### 1. Initial Setup

1. **Insert Batteries:** Open the battery compartment on the back of the SofaBaton U1 remote and insert the two AA batteries, ensuring correct polarity.
2. **Download the SofaBaton APP:** Search for "SofaBaton" in your smartphone's app store (App Store for iOS or

Google Play Store for Android) and download the official application.

3. **Pair Remote with APP:** Follow the on-screen instructions within the SofaBaton APP to pair your U1 remote control with your smartphone via Bluetooth.

## 2. Adding Devices

The SofaBaton U1 offers three primary methods for adding and configuring your entertainment devices:

- **IR Matching Mode:** This is the recommended method for most infrared devices. In the app, select the brand and model number of your device. The app will search its extensive cloud database for the corresponding IR codes.
- **Traditional IR Learning Mode:** For devices not found in the database or for specific functions, you can teach the U1 remote commands directly from your original remote. Point the original remote at the U1 and press the desired button to transfer the signal.
- **Bluetooth Mode:** For Bluetooth-enabled devices (e.g., some streaming sticks or smart TVs), the app will guide you through the Bluetooth pairing process.

Always ensure your devices are powered on and within range during the pairing process. The SofaBaton APP provides step-by-step guidance for each method.

## OPERATING YOUR SOFABATON U1

### Switching Between Devices

The SofaBaton U1 features an OLED display and a scroll wheel for quick device selection:

1. **Wake Up Display:** Pick up the remote or slide the scroll wheel to activate the OLED screen.
2. **Select Device:** Use the scroll wheel to navigate through the list of your paired devices displayed on the OLED screen.
3. **Confirm Selection:** Once the desired device is highlighted, the remote will automatically switch to control that

device.

## Pick up the remote control to wake up the OLED screen

Slide the scroll wheel to select the device you want to control

Image: Demonstrates how to use the scroll wheel to wake up the OLED screen and switch between different paired devices.

### Using Macro Commands

Macro commands allow you to execute a sequence of up to 10 actions with a single button press. This is particularly useful for turning on multiple devices, setting inputs, or performing complex operations.

1. **Program Macros:** Use the SofaBaton APP to define your macro sequences. You can combine commands from different devices and set custom interval times between each command.
2. **Assign to Button:** Assign the programmed macro to any button on your U1 remote.
3. **Execute Macro:** Press the assigned button to trigger the entire sequence of commands.

*Note: Macro functions are primarily designed for infrared (IR) controlled devices.*

# Easily program up to 10 commands into a single button

Allow you to control all of your different devices with this button

Image: Illustration of how to easily program up to 10 commands into a single button using the SofaBaton app.

## Customizing Buttons

The SofaBaton APP allows you to remap or reassign keys on your U1 remote. This means you can customize the function of almost any button to better suit your preferences or to control specific features of your devices.

- **Remapping:** Change the default function of a button to another command available in the database for the active device.
- **Learning:** Use the IR learning feature to assign a command from an original remote to any button on the U1.
- **Volume/Mute Control:** You can configure the volume and mute buttons to always control a specific device (e.g., your soundbar or AV receiver) regardless of which device is currently selected on the remote.

## CARE AND MAINTENANCE

- **Cleaning:** Use a soft, slightly damp cloth to clean the surface of the remote. Avoid using harsh chemicals or abrasive cleaners.
- **Battery Replacement:** When the remote's performance degrades or the OLED display becomes dim, replace

both AA batteries with new ones. Dispose of old batteries responsibly.

- **Storage:** Store the remote in a cool, dry place away from direct sunlight and extreme temperatures when not in use for extended periods.
- **Avoid Drops:** While durable, avoid dropping the remote to prevent internal damage.

## TROUBLESHOOTING

If you encounter issues with your SofaBaton U1 remote, please refer to the following common solutions:

- **Remote Not Responding:**
  - Check if the batteries are correctly inserted and have sufficient charge. Replace if necessary.
  - Ensure the remote is pointed directly at the device you intend to control.
  - Verify that the correct device is selected on the OLED display.
- **Device Not Pairing/Responding After Setup:**
  - **For IR Matching:** Double-check the brand and model number entered in the app. Try searching for just the brand name if the specific model number yields no results.
  - **For IR Learning:** Ensure the original remote has fresh batteries and is held steadily, pointing directly at the U1's IR receiver during the learning process. Try learning the command again.
  - **For Bluetooth:** Ensure the device's Bluetooth is enabled and in pairing mode.
  - Confirm that the device you are trying to control is IR or Bluetooth compatible, as Wi-Fi devices are not supported.
- **OLED Display Not Lighting Up:**
  - Slide the scroll wheel or pick up the remote to activate the screen.
  - Check battery level.
  - Adjust screen brightness and dormant time settings within the SofaBaton APP.
- **Macro Commands Not Working Correctly:**
  - Verify the sequence and commands programmed in the SofaBaton APP.
  - Adjust the interval time between commands if devices require more time to respond.
  - Ensure the macro is assigned to the correct button.

For further assistance, please refer to the support section or contact SofaBaton customer service.

## PRODUCT SPECIFICATIONS

Feature	Detail
Model Number	U1
Product Dimensions	7.7 x 1.9 x 1.2 inches
