2. SAFETY WARNINGS

Please read and understand all safety information before assembling and using this product. Failure to follow these instructions may result in injury or damage to the product.

- **Sharp Edges:** Exercise caution during assembly and handling to avoid injury from sharp edges on metal components.
- **Weight Limit:** Do not load the bed base with more than 220 pounds (approximately 100 kg). Exceeding this limit can compromise the structural integrity and lead to damage or injury.
- **Assembly:** Ensure all parts are correctly assembled and tightened according to the instructions. Do not use power tools for tightening unless explicitly stated, as over-tightening can strip screws or damage components.
- **Placement:** Place the bed base on a flat, level surface to ensure stability and prevent wobbling.
- **Children:** Keep small parts and packaging materials away from children to prevent choking hazards.

5. MAINTENANCE

Regular maintenance will help preserve the condition and extend the lifespan of your DEWINNER bed base.

- **Cleaning:** Wipe the metal frame with a damp cloth and mild detergent if necessary. Dry thoroughly. For wooden slats, a dry cloth is usually sufficient. Avoid harsh chemicals or abrasive cleaners.
- **Check Connections:** Periodically (e.g., every 6 months) check all bolts and screws to ensure they remain tight. Retighten if any looseness is detected.
- **Slats Inspection:** Inspect the wooden slats for any signs of damage, cracks, or excessive wear. Damaged slats should be replaced to maintain proper support and prevent mattress damage.
- **Movement:** If moving the bed base, lift it rather than dragging it to prevent damage to the legs or frame. For long-distance transport, consider disassembling the base for easier and safer handling.

6. TROUBLESHOOTING

This section addresses common issues you might encounter with your bed base.

6.1 Squeaking Noises

- **Loose Connections:** Squeaking often indicates loose bolts or screws. Re-tighten all connections on the frame and legs.
- **Slats Friction:** Ensure all slats are properly seated in their holders. If friction between slats and frame is suspected, a thin piece of felt or fabric can be placed at contact points.
- **Uneven Surface:** Ensure the bed base is on a flat, level floor. An uneven surface can cause stress on the frame, leading to noise.

6.2 Instability or Wobbling

- **Loose Legs:** Check that all 9 legs are securely attached and tightened.
- **Uneven Floor:** If the floor is uneven, use furniture pads or shims under the legs to level the bed base.
- **Incorrect Assembly:** Review the assembly instructions to ensure all components are correctly installed.

6.3 Damaged Slats

- If a slat is cracked or broken, it should be replaced immediately to maintain proper mattress support and prevent further damage. Contact DEWINNER customer support for replacement parts.
