1. INTRODUCTION

The Tramex Concrete Moisture Encounter CMEX5 is a versatile digital multi-moisture meter designed for accurate and non-destructive measurement of moisture content and relative humidity in various building materials. It is suitable for professionals in flooring, water damage restoration, inspection, surveying, and indoor air quality industries. The device features Bluetooth connectivity for seamless integration with the Tramex Meters App on iOS and Android devices, enabling advanced data logging, moisture mapping, and reporting capabilities.

Figure 1: Front view of the Tramex CMEX5, showing the digital display and control buttons.

Key Benefits

Instant, Non-Destructive Tests
No drilling, no wait time

Most Accurate Results
Fast Gravimetric based %MC

ASTM F2659 Compliant
Official NDT concrete test

App Connectivity
Syncs with Tramex Meters App to log and map

TRAMEX

Figure 2: Visual representation of the key benefits of the Tramex CMEX5, including instant non-destructive tests, accurate results, ASTM F2659 compliance, and app connectivity.

2. SAFETY INFORMATION

Please read and understand all safety instructions before operating the Tramex CMEX5. Failure to follow these instructions may result in injury or damage to the device.

- Keep the device dry. Do not expose it to moisture or extreme temperatures.
- Do not attempt to open or modify the device. Refer all servicing to qualified personnel.
- Use only specified batteries (2 AA batteries). Ensure correct polarity when installing.
- Keep out of reach of children.
- Avoid dropping the device or subjecting it to strong impacts.
- When using external probes, ensure they are securely connected to prevent inaccurate readings or damage.

3. COMPONENTS

The Tramex CMEX5 includes the following main components:

1. **Main Unit:** The handheld meter with a digital display and control buttons.
2. **Built-in Ambient Sensor:** Located at the top of the device, measures ambient relative humidity, temperature, dew point, and humidity ratio.
3. **Non-Destructive Electrodes:** Located on the base of the unit for non-invasive moisture measurements.
4. **External Probe Port:** For connecting optional external probes such as the Concrete Moisture Probe or Pin Probe.
5. **Battery Compartment:** Located on the back of the unit.

Figure 3: Side view of the Tramex CMEX5, highlighting its ergonomic design.

Figure 4: Back view of the Tramex CMEX5, showing the battery compartment and non-destructive electrodes.

4. SETUP

4.1. Battery Installation

1. Locate the battery compartment cover on the back of the CMEX5 unit.
2. Slide or unclip the cover to open the compartment.
3. Insert 2 AA batteries, ensuring correct polarity as indicated inside the compartment.
4. Replace the battery compartment cover securely.

4.2. Powering On/Off

Press and hold the power button () located on the front panel to turn the device on or off.

4.3. App Installation (Optional)

For enhanced functionality, download the "Tramex Meters App" from your device's app store (iOS or Android). The app allows for Bluetooth connectivity, data logging, moisture mapping, and report generation.

Video 1: This video demonstrates the features and usage of the Tramex Meters App, including connecting to 5-series moisture meters like the CMEX5, viewing readings, and utilizing advanced features such as thermal condition charts and psychometric charts.

5. OPERATING INSTRUCTIONS

The Tramex CMEX5 offers multiple measurement modes:

5.1. Non-Destructive Moisture Measurement (Concrete & General Building Materials)

1. Ensure the device is powered on.
2. Place the base of the CMEX5 firmly onto the surface of the material to be tested. The non-destructive electrodes on the base will make contact.
3. Read the moisture content percentage directly from the digital display. The device measures to a depth of approximately 3/4 inch (20 mm).
4. For concrete, the display shows Concrete %MC. The meter has Anhydrite & Gypsum scales.

How It Works

The **Concrete Moisture Encounter CMEX5** is designed to **deliver fast, precise readings**, allowing professionals to **instantly assess moisture levels** without damaging the surface.

Its **user-friendly interface** ensures that you get **accurate data** with just a simple touch on the surface, **saving valuable time on every project**.

Step 1: Place on concrete.

Step 2: Instantly measure moisture on screen.

Step 3: Sync to Tramex Meters App for detailed moisture mapping.

TRAMEX CMEX5			
4.4			
CONCRETE %MC			
AMBIENT			
74.5	53.1	56.3	67.6

Figure 5: Step-by-step illustration of how to use the Tramex CMEX5 for non-destructive moisture assessment, including placing the

Concrete Moisture Encounter

CMEX5

“Get Accurate, Non-Destructive Moisture Readings For Concrete And More.”

Figure 6: A hand holding the Tramex CMEX5, demonstrating the ease of use and visibility of the digital display during operation.

5.2. Ambient Relative Humidity and Temperature Measurement

The built-in hygrometer continuously measures ambient conditions:

- Relative Humidity (RH%)
- Temperature (T°F/°C)
- Dew Point (DP°F/°C)
- Humidity Ratio (HR G/lb)

These readings are displayed on the main screen alongside moisture content measurements.

5.3. External Probe Measurements (Optional)

The CMEX5 supports optional external probes for specialized measurements:

- **Concrete Moisture Probe:** Measures in-situ moisture content up to 100 mm (4 inches) deep. Connect the

probe to the external port and follow the probe's specific instructions for use.

- **Pin Meter Probe:** Measures percentage moisture content of wood, drywall, and other building materials. Connect the pin probe to the external port and insert the pins into the material. The CMEX5 can be calibrated for over 500 different wood species via the app.
- **Hygro-i2 RH Probe:** For in-situ relative humidity testing in concrete slabs (ASTM F2170 compliant). Connect the probe to the external port.

Versatility In Action

Multi-Test Capability

%MC Probe Test

%MC NDT ASTM F2659

Figure 7: Depiction of the CMEX5's multi-test capability, showing its use with Hygro-i2 RH probes, concrete moisture probes, and an extension handle for various applications.

5.4. App Integration and Data Management

Connect the CMEX5 to the Tramex Meters App via Bluetooth for advanced features:

- **Real-time Readings:** View all measurements on your smartphone or tablet.
- **Data Logging:** Log readings over time for continuous monitoring.
- **Moisture Mapping:** Create visual maps of moisture levels.
- **Report Generation:** Generate geo-tagged and time-stamped reports with photos.
- **Wood Species Selection:** For pin probe measurements, select from over 500 wood species for accurate

readings.

Figure 8: Screenshot illustrating the Tramex Meters App interface, showing psychrometric readings and options for thermal condition, psychometrics, photo capture, and logging status.

6. MAINTENANCE

6.1. Cleaning

Wipe the device with a soft, dry cloth. Do not use abrasive cleaners or solvents. Ensure the non-destructive electrodes on the base are clean and free of debris for accurate readings.

6.2. Storage

Store the CMEX5 in a cool, dry place away from direct sunlight and extreme temperatures. If storing for extended periods, remove the batteries to prevent leakage.

6.3. Battery Replacement

Replace batteries when the low battery indicator appears on the display. Refer to Section 4.1 for battery installation

instructions.

7. TROUBLESHOOTING

Problem	Possible Cause	Solution
Device does not power on.	Dead or incorrectly installed batteries.	Check battery polarity or replace with new AA batteries.
Inaccurate readings.	Dirty electrodes; improper contact with surface; external interference.	Clean electrodes; ensure firm, flat contact; move away from strong electromagnetic fields.
Bluetooth connectivity issues.	Bluetooth off on device/phone; out of range; app not updated.	Ensure Bluetooth is enabled on both devices; move closer to the meter; update Tramex Meters App.
External probe not recognized.	Probe not securely connected; damaged probe.	Ensure probe is fully inserted and locked; inspect probe for damage.

8. SPECIFICATIONS

Feature	Detail
Product Dimensions	7 x 3.5 x 1.5 inches
Item Model Number	CMEX5
Batteries	2 AA batteries required (included)
Item Weight	12.59 ounces (357 Grams)
Manufacturer	Tramex
Color	Black, Red, White
Mounting Type	Surface Mount
Measurement Depth (Non-destructive)	Up to 3/4 inch (20 mm) into the slab
Connectivity	Bluetooth for iOS & Android App
Compliance	ASTM F2659 (Non-destructive concrete test)

9. WARRANTY & SUPPORT

For detailed warranty information, product registration, and technical support, please visit the official Tramex website or contact their customer service department. Keep your purchase receipt as proof of purchase for warranty claims.

Official Tramex Website: www.tramexmeters.com

For additional resources, including the User Guide (PDF), please refer to the product page where you purchased the device.
