OPERATING INSTRUCTIONS

1. Power On/Off

- **Power On:** Press and hold the Power button for approximately 3 seconds until the LED indicator lights up.
- **Power Off:** Press and hold the Power button for approximately 3 seconds until the LED indicator turns off.

2. Bluetooth Pairing (Wireless Mode)

After powering on, the headset will automatically enter pairing mode (LED indicator will flash). On your device (smartphone, PC, console), enable Bluetooth and search for "Picun Elite P80S". Select it to connect. A voice prompt will confirm successful pairing. The headset maintains a stable connection up to 10 meters.

INSTANT AND STABLE CONNECTION

Smart BT chip, high response transmission power, smoothly play music, games, and answer calls without delay with stable and reliable connection.

3. Wired Mode (AUX Connection)

To use the headset in wired mode, connect the provided 3.5mm AUX audio cable to the headset's AUX port and to your audio source. Wired mode allows for indefinite playback regardless of battery charge. The headset functions as a passive headphone in wired mode.

4. Microphone Usage

- **Detachable Pro Microphone:** Provides high-definition vocals and effectively reduces ambient noise for clear communication during gaming or calls.
- **Inbuilt Microphone:** An additional microphone is integrated for general use, ensuring seamless communication even without the detachable mic.

5. Audio Features

The Picun Elite P80S provides omnidirectional stereo sound, allowing for an immersive audio experience, especially beneficial for gaming to detect subtle sound cues.

6. Media Controls

The headset features integrated buttons for easy control:

- **Play/Pause:** Press the Multi-function button once to play or pause music/videos.
- **Answer/End Call:** Press the Multi-function button once to answer an incoming call, and again to end it.
- **Volume Control:** Use the Volume Up (+) and Volume Down (-) buttons to adjust the audio level.
- **Next/Previous Track:** Long press Volume Up (+) for next track, Long press Volume Down (-) for previous track.

7. Dual Shock / Vibration Mode

Activate the Dual Shock / Vibration Mode for an enhanced immersive experience, particularly for deep bass in music and movies, or realistic vibrations during gaming. This mode can be toggled on or off using the dedicated switch on the headset.

MAINTENANCE

- **Cleaning:** Use a soft, dry cloth to clean the headset. Do not use abrasive cleaners or solvents.
- **Storage:** Store the headset in a cool, dry place away from direct sunlight and extreme temperatures. The foldable design allows for compact storage.
- **Battery Care:** To prolong battery life, avoid fully discharging the headset frequently. Charge it regularly, even if not in use for extended periods.
- **Cable Care:** Handle cables gently. Avoid sharp bends or excessive pulling to prevent damage.

TROUBLESHOOTING

No Power / Headset Not Turning On

- Ensure the headset is fully charged. Connect it to a power source using the USB charging cable.
- Verify that the power button is pressed and held for the correct duration (approx. 3 seconds).

Cannot Pair via Bluetooth

- Make sure the headset is in pairing mode (LED flashing). If not, power it off and on again.
- Ensure Bluetooth is enabled on your device and it is within 10 meters of the headset.
- Remove "Picun Elite P80S" from your device's Bluetooth list and attempt to pair again.

- Try pairing with a different device to rule out device-specific issues.

No Sound / Low Volume

- Check the volume levels on both the headset and your connected device.
- If in wired mode, ensure the 3.5mm AUX cable is fully inserted into both the headset and the audio source.
- If in wireless mode, ensure the headset is properly paired and connected.
- Test with different audio sources or applications.

Microphone Not Working

- Ensure the detachable microphone is securely plugged into the headset.
- Check microphone settings on your connected device (e.g., input device selection, volume levels).
- Test the microphone in different applications or communication platforms.

One Earpiece Not Working

- Check audio balance settings on your connected device.
- If using the AUX cable, ensure it is fully inserted and try a different cable if available.
- Restart the headset and your connected device.
