

## RORIOS AA-MB002

# RORIOS AA-MB002 Women's Analogue Quartz Watch Instruction Manual

Model: AA-MB002

## INTRODUCTION

This manual provides instructions for the RORIOS AA-MB002 Women's Analogue Quartz Watch. Please read this manual carefully before using your watch to ensure proper operation and longevity. This watch features a classic square dial with a diamond mirror effect and a durable stainless steel strap.

## SETUP

### 1. Setting the Time

1. **Pull out the crown:** Gently pull the crown (the small knob on the side of the watch case) outwards to the time-setting position.
2. **Adjust the hands:** Rotate the crown to move the hour and minute hands clockwise or counter-clockwise until the desired time is set.
3. **Push in the crown:** Once the time is set, push the crown back into its normal operating position. This will start the watch movement.

## **2. Adjusting the Watch Band**

The stainless steel strap can be adjusted to fit your wrist size. A link remover tool is included with your watch for this purpose. If you are unsure, it is recommended to have a professional jeweler adjust the band.

- Identify the removable links on the strap.
- Use the provided link remover tool to carefully push out the pins holding the links together.
- Remove the necessary number of links to achieve a comfortable fit.
- Reassemble the strap by inserting the pins back into place.

## Soft Steel Belt

Made of Steel Band,  
Easy and Comfortable to Wear

## Fine Steel Crown

Premium & Luxury

## OPERATING INSTRUCTIONS

Your RORIOS watch is an analogue quartz timepiece, powered by a reliable Japanese battery. Once the time is set, the watch will operate continuously, displaying the current time with its hour, minute, and second hands.

- **Time Display:** The watch displays time using three hands: an hour hand, a minute hand, and a second hand.
- **Accuracy:** Quartz movements are known for their high accuracy and require minimal adjustment once set.
- **Power Source:** The watch is powered by a small button-cell battery.

## **MAINTENANCE**

---

### **1. Cleaning Your Watch**

- Wipe the watch case and strap regularly with a soft, dry cloth to remove dust and dirt.
- For the stainless steel strap, a slightly damp cloth can be used, followed by immediate drying.
- Avoid using harsh chemicals, solvents, or abrasive cleaners, as these can damage the watch's finish and internal components.

### **2. Battery Replacement**

The watch is equipped with a long-lasting Japanese battery. When the watch stops running, it indicates that the battery needs to be replaced. It is recommended to have the battery replaced by a qualified watch technician to prevent damage to the watch's internal mechanism and to ensure proper sealing.

### **3. General Care**

- Avoid exposing the watch to extreme temperatures (hot or cold) or sudden temperature changes.

- Keep the watch away from strong magnetic fields, as these can affect the accuracy of the quartz movement.
- While the watch features durable mineral glass, avoid dropping it or subjecting it to strong impacts.

## Classic Square Dial & Diamond Mirror

Cutting and Polishing Process

### TROUBLESHOOTING

Problem	Possible Cause	Solution
Watch is not running	Crown is pulled out; Battery is depleted	Push the crown back in; Replace the battery (professional service recommended)
Time is inaccurate	Time not set correctly; Exposure to strong magnetic fields; Low battery	Reset the time; Keep watch away from magnets; Replace the battery
Strap feels too loose or too tight	Incorrect band adjustment	Adjust the strap using the link remover tool or seek professional assistance
