Model: Q1615-LE Mk III | Brand: Axis Communications

INTRODUCTION

The AXIS Q1615-LE Mk III is a high-performance 2-megapixel outdoor network camera, engineered to deliver exceptional imaging and video quality. This model integrates advanced hardware and processing capabilities, making it an ideal platform for analytics powered by artificial intelligence (AI) and deep learning. Its robust design ensures reliable operation in diverse outdoor environments.

Key Features

- **Powerful AI with Deep Learning:** Equipped with a dual chipset (Axis ARTPEC and DLPU) for advanced AI-based object classification.
- **Granular Object Classification:** Distinguishes between various vehicle types (bikes, cars, buses, trucks) and humans, reducing false alarms.
- **Support for 3rd-Party AI Applications:** Open Axis platform allows integration of tailor-made AI applications.
- **Edge-Based Processing for Scalability:** Analytics run directly on the camera, reducing server load, improving speed, and lowering costs.
- **Premium Axis Q-line Camera Features:** Includes high-quality imaging, OptimizedIR (up to 60m/196ft) for clear night vision, and robust outdoor ratings (IP66, IP67, NEMA 4X).

SAFETY INFORMATION

Please read all safety instructions carefully before installation and operation. Failure to follow these instructions may result in injury, damage to the product, or voiding of the warranty.

- **Electrical Safety:** Installation must be performed by qualified personnel in accordance with all local and national electrical codes. Ensure power is disconnected before any installation or maintenance.
- **Mounting:** The camera must be securely mounted to a surface capable of supporting its weight. Use appropriate fasteners for the mounting surface.
- **Environmental Conditions:** While designed for outdoor use, avoid exposing the camera to extreme conditions beyond its specified operating temperature and humidity ranges.
- **Cleaning:** Use only a soft, damp cloth for cleaning. Avoid abrasive cleaners or solvents that could damage the camera's finish or lens.

SETUP

Mounting the Camera

1. **Choose a Location:** Select a suitable outdoor location that provides the desired field of view and is within reach of power and network connections. Ensure the mounting surface is sturdy.
2. **Attach Wall Mount:** Use the included AXIS T94Q01A Wall Mount. Securely fasten the mount to the chosen surface using appropriate screws (not included, typically).
3. **Attach Camera to Mount:** Align the camera with the wall mount and secure it using the provided hardware. Adjust the camera's angle for optimal viewing.
4. **Install Sunshield:** Attach the sunshield using the Sunshield Connector Kit to protect the lens from direct sunlight and reduce glare.

Powering On

The AXIS Q1615-LE Mk III camera can be powered via Power over Ethernet (PoE) or a DC power supply.

- **PoE Connection:** Connect an Ethernet cable from a PoE-enabled switch or injector to the camera's Ethernet port. This provides both power and network connectivity.
- **DC Power:** If not using PoE, connect a compatible DC power adapter (not included) to the camera's DC input port.

Network Connection

Connect the camera to your network using a standard Ethernet cable. For initial setup, it is recommended to connect the camera directly to a computer or a local network segment where you can easily discover its IP address.

Figure 2: Side view of the camera illustrating potential mounting and connection points.

OPERATING INSTRUCTIONS

Accessing the Camera Interface

1. **Discover Camera:** Use the AXIS IP Utility or AXIS Device Manager software to discover the camera on your network and find its IP address.
2. **Log In:** Open a web browser and enter the camera's IP address. Log in using the default credentials (typically username 'root' and password 'pass' for first-time setup, which you will be prompted to change).

Configuring Video Settings

Once logged in, navigate to the 'Video' or 'Stream' settings to adjust parameters such as resolution, frame rate, compression, and image quality. The camera supports 1080p video capture resolution.

Using Object Analytics

The AXIS Q1615-LE Mk III features powerful AI-based object analytics. Access the 'Analytics' section in the camera's web interface to configure detection zones, set up rules for different object types (e.g., cars, bikes, humans), and define actions to be triggered upon detection (e.g., send notifications, record video).

MAINTENANCE

Cleaning

Regular cleaning helps maintain optimal image quality and extends the camera's lifespan.

- **Lens:** Gently wipe the lens with a soft, lint-free cloth. For stubborn dirt, use a lens cleaning solution designed for optical surfaces.
- **Housing:** Clean the camera housing with a soft, damp cloth. Avoid using harsh chemicals or abrasive materials.

Firmware Updates

Periodically check the Axis Communications website for firmware updates. Keeping your camera's firmware up-to-date ensures access to the latest features, performance improvements, and security patches. Follow the instructions provided by Axis for the update process.

TROUBLESHOOTING

This section provides solutions to common issues you might encounter.

- **No Power:**
 - Verify that the PoE switch/injector is powered on and functioning correctly.
 - If using a DC adapter, ensure it is properly connected and providing the correct voltage.
 - Check the Ethernet cable for damage or loose connections.
- **No Network Connection:**
 - Ensure the Ethernet cable is securely connected at both ends.
 - Check network switch/router status.
 - Verify the camera's IP address and network settings are correct and not conflicting with other devices.
 - Temporarily disable any firewall on your computer during initial setup.
- **Poor Image Quality:**
 - Clean the camera lens.
 - Adjust focus settings in the camera's web interface (Auto Focus is available).
 - Check lighting conditions. Ensure OptimizedIR is enabled for low-light environments.
 - Adjust video resolution and compression settings.
- **False Alarms from Analytics:**
 - Refine detection zones and sensitivity settings in the analytics configuration.
 - Ensure the camera's view is clear of obstructions that might trigger false detections.
 - Update camera firmware to the latest version for improved analytics performance.
