Camco 42139

Camco 42139 RS620 Flying Insect Screen for Dometic RV Refrigerator Vents

MODEL: 42139

Introduction

This instruction manual provides essential information for the proper installation and maintenance of your Camco 42139 RS620 Flying Insect Screens. These screens are designed to protect your Dometic RV refrigerator vents from unwanted pests, ensuring optimal airflow and preventing potential damage.

Product Overview

The Camco 42139 RS620 Flying Insect Screens are specifically engineered for new style Dometic RV refrigerator vents that feature 20-inch long louver openings. They provide a protective barrier against insects, birds, and rodents without significantly restricting necessary airflow.

Key Features:

- **Protective Barrier:** Effectively keeps out nesting insects, birds, and rodents.
- **Optimal Airflow:** Designed to minimize airflow restriction for efficient refrigerator operation.
- **Compatibility:** Fits new style Dometic refrigerator vents with 20-inch long louver openings.
- **Durable Construction:** Made from heavy-duty stainless-steel mesh for longevity.
- **Easy Installation:** Simple attachment process using included cable ties.

What's Included:

- (3) Stainless Steel Insect Screens (20-inches L x 1.5-inches W)
- (7) Cable Ties for Installation

General Product Video (Installation methods may vary by model):

Video: An overview of Camco Flying Insect Screens, demonstrating their purpose and general installation. Note: Installation methods may vary for specific models; refer to the detailed instructions below for model 42139.

Safety Information

- Always ensure the RV refrigerator is turned off and cooled down before attempting installation or maintenance.
- Wear appropriate personal protective equipment, such as gloves, to prevent cuts from screen edges.
- Keep small parts, like cable ties, out of reach of children.
- Do not obstruct the refrigerator vent openings beyond what the screen is designed for, as this can impair appliance function.

Installation Instructions

The Camco 42139 RS620 screens are designed for easy installation using the provided cable ties. Ensure your Dometic RV refrigerator vents have 20-inch long louver openings for proper fit.

1. **Prepare the Vent:** Ensure the refrigerator vent area is clean and free from debris.
2. **Position the Screen:** Place one of the stainless steel insect screens over a louver opening of your Dometic RV refrigerator vent. The screen should cover the entire opening.
3. **Secure with Cable Ties:** Thread a cable tie through the mesh of the screen and around a secure point on the vent louver or frame. Ensure the screen is held firmly against the vent.
4. **Tighten Cable Ties:** Pull the cable tie tight to secure the screen in place. Trim any excess length from the cable tie for a neat finish.
5. **Repeat for Remaining Screens:** Follow steps 2-4 for the remaining two screens, ensuring all louver openings are adequately covered. Use additional cable ties as needed to ensure a snug fit and prevent gaps.
6. **Verify Installation:** Gently tug on each screen to confirm it is securely attached and there are no gaps large enough for pests to enter.

Operation

Once installed, the Camco 42139 RS620 Flying Insect Screens operate passively by providing a physical barrier. No further action is required for their function. They allow air to circulate freely while preventing pests from entering and potentially damaging your RV refrigerator's internal components.

Maintenance

- **Regular Inspection:** Periodically inspect the screens for any signs of damage, wear, or accumulation of debris.
- **Cleaning:** If debris or dirt accumulates on the screens, gently brush it off or rinse with water. Ensure the screens are dry before re-installation if removed for cleaning.
- **Secureness Check:** Occasionally check that the cable ties are still tight and the screens are securely in place. Replace any broken or loose cable ties.

Troubleshooting

As a passive protective device, the insect screens typically do not require complex troubleshooting. If you encounter issues:

- **Pests are still entering:** Re-examine the installation to ensure there are no gaps between the screen and the vent frame. Tighten or add more cable ties if necessary. Verify that the screens are correctly sized for your specific Dometic RV refrigerator vents.
- **Screen is loose:** Check the cable ties. If they are loose or broken, replace them with new ones, ensuring a tight fit.

Specifications

Brand	Camco
Model Number	42139
Style	RS620
Material	Alloy Steel (Stainless Steel Mesh)
Product Dimensions (each screen)	20 inches (L) x 1.5 inches (W)
Unit Count	3.0 Count
Item Weight	6.4 ounces
Compatibility	New style Dometic RV refrigerator vents with 20-inch long louver openings
UPC	014717421393
