

## FEZIBO FEZIBO 63x24 Electric Standing Desk (B08GFCHRRL)

# FEZIBO Height Adjustable Electric Standing Desk

## INSTRUCTION MANUAL

### Product Overview

The FEZIBO Height Adjustable Electric Standing Desk is designed to provide a versatile and ergonomic workspace. It features an electric lifting system for seamless height adjustments, programmable memory settings, and anti-collision technology for enhanced safety. The desk is constructed with industrial-grade alloy steel and a solid desktop, ensuring stability and durability for daily use in home or office environments.

#### Key Features:

- Electric height adjustment from 28.3" to 45.5" (30.3"-48.5" with casters).
- Smooth and quiet operation (under 50 dB) at 0.8" per second.
- Robust construction with a 176 lbs weight capacity.
- 3 programmable memory height buttons for personalized settings.
- Advanced anti-collision technology to prevent damage or injury.

### Safety Information

For safe and proper use of your FEZIBO Electric Standing Desk, please adhere to the following safety guidelines:

- Always ensure the desk is adjusted to an appropriate height for your body to prevent strain and injury.
- Do not exceed the maximum weight capacity of 176 lbs (80 kg) to maintain the stability and safety of the desk.
- Carefully follow all assembly instructions to ensure the desk is properly secured and stable.
- Keep the area around the desk clear of obstacles during height adjustments to prevent triggering the anti-collision function or causing damage.
- Ensure all cables are properly managed and secured to avoid tripping hazards or damage to the electrical components.

### Setup and Assembly

The assembly process for your FEZIBO standing desk has been optimized for convenience. All necessary assembly tools and detailed instructions are included in the package.

Before beginning assembly, please ensure all parts are present and accounted for by checking the parts list provided in your manual. The desktop is designed in two pieces for easier handling and robust construction.

For a visual guide, a detailed electric standing desk installation video is available. Please refer to the video for step-by-step assembly instructions.

## Operating Instructions

Your FEZIBO electric standing desk is equipped with an intuitive control panel for easy height adjustment and memory settings.

Image: The FEZIBO electric standing desk in a typical setup, highlighting the control panel.

**Height Adjustment:** The desk can be adjusted between 28.3 inches and 45.5 inches (or 30.3 inches to 48.5 inches if detachable lockable casters are installed). Use the up and down arrow buttons on the control panel to precisely adjust the desk to your desired height. The desk moves at an average speed of 0.8 inches per second with minimal noise.

Image: Visual representation of the desk's continuous height adjustment capability.

**Memory Height Settings:** The control panel features 3 programmable memory height buttons (labeled 1, 2, 3). To save a preferred height, adjust the desk to the desired position, then press the 'S' button followed by one of the numbered memory buttons (1, 2, or 3). The desk will then move to this saved height with a single press of the corresponding memory button.

**Anti-Collision Technology:** The desk is equipped with an anti-collision function. If the desk encounters an obstacle during movement (either rising or lowering), it will automatically stop and move approximately 2 cm in the opposite direction to prevent potential damage or injury. Refer to the troubleshooting section for adjusting the sensitivity of this feature.

**Weight Capacity:** The desk is designed to support a maximum weight of 176 lbs (80 kg). Ensure that the total weight of items placed on the desktop does not exceed this limit to maintain optimal performance and safety.

Image: The desk's dimensions and maximum weight capacity are displayed.

**Cable Management:** The desk includes a cable tray for organizing power cords and other cables, contributing to a tidy and safe workspace.

Image: The integrated cable tray provides support and helps maintain stability by organizing cables.

## Maintenance

---

To ensure the longevity and optimal performance of your FEZIBO electric standing desk, regular maintenance is recommended:

- Keep the desk surface clean by wiping it with a soft, damp cloth. Avoid abrasive cleaners or harsh chemicals.
- Periodically check all screws and connections to ensure they are secure. Tighten if necessary.
- Ensure the area around the desk legs is free from dust and debris, which could interfere with the smooth operation of the lifting mechanism.
- Avoid spilling liquids directly onto the control panel or motor components. In case of a spill, immediately unplug the desk and allow it to dry completely before reconnecting.

## Troubleshooting

---

This section provides solutions for common issues you might encounter with your FEZIBO electric standing desk. Error codes displayed on the control panel indicate specific problems.

[Video: Official FEZIBO Troubleshooting and Solutions guide for the standing desk.](#)

### Error Code: E-1 or rES (Reset Required / Inconsistent Leg Height)

- **Cause:** This error indicates that a reset is required, or the height of the legs is inconsistent after operation.
- **Solution:** Keep pressing the "down" key until the desktop display shows "rES" alternately. Release the key. Then, keep pressing the "down" key; the desktop will move slowly down and return back until the display shows "27.6".

Release the key. The height-adjustable desk resetting is finished.

#### **Error Code: ovr (Overload)**

- **Cause:** The load on the desktop exceeds the maximum weight capacity of 176 pounds.
- **Solution:** Remove the excess load from the desktop until it is less than 176 lbs for further operation.

#### **Error Code: E-2 (Anti-Collision Triggered)**

- **Cause:** The anti-collision function has been triggered due to an obstacle.
- **Solution 1:** Remove the obstacle that triggered the anti-collision system.
- **Solution 2 (Lowering Sensitivity):** If the anti-collision is too sensitive, you can lower its sensitivity. Keep pressing the key "S" for 10 seconds until the display shows "A--". Pressing key "S" saves the setting. Pressing the "UP" key adjusts the number to "15". Pressing the "Down" key will display "P--".

#### **Error Code: dut (Duty Cycle Exceeded)**

- **Cause:** The actual running time has exceeded the duty cycle, indicating the motor needs to cool down.
- **Solution:** Make the desk rest for approximately 15 minutes for further operation.

#### **Error Code: E-3 (Motor Connection Failure)**

- **Cause:** Motors have failed to connect with the control cable.
- **Solution:** Check whether any motors are disconnected from the control unit. Please connect the main cable again and wait at least 5 seconds. Connect all the plugs. Then, perform a reset: Keep pressing the "down" key until the desktop display shows "rES" alternately. Release the key. Then, keep pressing the "down" key; the desktop will move slowly down and return back until the display shows "27.6"". Release the key.

#### **Error Code: hot (Motor Overheating)**

- **Cause:** The motor temperature protection has been triggered due to overheating from continuous use.
- **Solution:** Make the desk rest for approximately 15 minutes for further operation.

## **Specifications**

<b>Brand</b>	FEZIBO
<b>Product Dimensions</b>	24"D x 63"W x 27.36"H
