Important Safeguards

When using electrical appliances, basic safety precautions should always be followed, including:

- Read all instructions before operating this appliance.
- Do not touch hot surfaces. Use handles or knobs.
- To protect against electrical shock, do not immerse cord, plugs, or any part of the appliance in water or other liquids.
- Close supervision is necessary when any appliance is used by or near children.
- Unplug from outlet when not in use and before cleaning. Allow to cool before putting on or taking off parts, and before cleaning the appliance.
- Do not operate any appliance with a damaged cord or plug, or after the appliance malfunctions or has been damaged in any manner. Return the appliance to the nearest authorized service facility for examination, repair, or adjustment.
- The use of accessory attachments not recommended by the appliance manufacturer may cause injuries.
- Do not use outdoors.

- Do not let cord hang over edge of table or counter, or touch hot surfaces.
- Do not place on or near a hot gas or electric burner, or in a heated oven.
- Extreme caution must be used when moving an appliance containing hot oil or other hot liquids.
- Do not use appliance for other than intended use.
- A short power-supply cord is provided to reduce the risk resulting from becoming entangled in or tripping over a longer cord.

Setup and First Use

1. **Unpacking:** Carefully remove the waffle maker from its packaging. Remove all packing materials, stickers, and labels.
2. **Initial Cleaning:** Wipe the exterior of the waffle maker with a damp cloth. Clean the non-stick cooking plates with a damp cloth or sponge. Do not immerse the unit in water. Dry thoroughly.
3. **Placement:** Place the waffle maker on a stable, heat-resistant surface, away from walls and other appliances to allow for proper ventilation.
4. **Pre-seasoning (Optional):** For the first use, it is recommended to lightly coat the non-stick cooking plates with a small amount of cooking oil or non-stick spray. Close the lid and allow the unit to heat up for 5-10 minutes. Unplug and let it cool, then wipe clean. This helps condition the non-stick surface.

Operating Instructions

Follow these steps to prepare delicious Belgian waffles:

1. **Prepare Batter:** Prepare your favorite waffle batter according to recipe instructions.
2. **Preheat:** Plug the waffle maker into a 120V AC electrical outlet. The power indicator lights will illuminate. Close the lid.
3. **Adjust Temperature:** Use the adjustable thermostat control knob to select your desired cooking temperature. There are nine settings, from minimum (MIN) for lighter waffles to maximum (MAX) for crispier, darker waffles.

Image: Detail of the thermostat control knob, showing settings from MIN to MAX.

4. **Ready Indicator:** Allow the waffle maker to preheat. The indicator light will signal when the unit has reached the set temperature and is ready for batter.

Image: Detail of the power indicator lights, showing when the waffle maker is preheated and when waffles are cooked.

5. **Add Batter:** Open the lid using the cool-touch handle. Pour approximately 1 cup of batter onto the center of the lower cooking plate. Close the lid.
6. **Cooking:** The waffle will cook for several minutes. The indicator light will signal again when the waffle is cooked to the desired crispness, based on your temperature setting. Cooking time may vary depending on batter type and desired browning.
7. **Remove Waffle:** Once cooked, open the lid using the cool-touch handle. Carefully remove the waffle using a heat-resistant plastic or wooden utensil. Do not use metal utensils, as they can damage the non-stick coating.
8. **Repeat:** Close the lid and allow the waffle maker to reheat briefly before adding more batter for subsequent waffles.

Helpful Tips:

- For best results, ensure the waffle maker is fully preheated before adding batter.
- Do not overfill with batter, as it may overflow.
- The cool-touch handle ensures safe operation when opening and closing the lid.

Maintenance and Cleaning

Proper cleaning and maintenance will extend the life of your waffle maker.

1. **Unplug and Cool:** Always unplug the waffle maker from the electrical outlet and allow it to cool completely before cleaning.
2. **Cleaning Cooking Plates:** The non-stick cooking plates are easy to clean. Use a damp cloth or sponge to wipe away any batter residue. For stubborn residue, apply a small amount of cooking oil to the residue, let it sit for 5 minutes, then wipe clean. Do not use abrasive cleaners, scouring pads, or metal utensils, as these can damage the non-stick surface.
3. **Cleaning Exterior:** Wipe the exterior of the waffle maker with a damp cloth. Dry thoroughly. Do not immerse the appliance in water or any other liquid.
4. **Storage:** Once clean and dry, store the waffle maker in a cool, dry place. The integrated cord wrap feature allows for tidy storage of the power cord.

Troubleshooting

Problem	Possible Cause	Solution
Waffle maker does not heat up.	Not plugged in; power outlet malfunction; appliance malfunction.	Ensure the unit is securely plugged into a working outlet. Check household circuit breaker. If problem persists, contact customer support.
Waffles stick to the plates.	Insufficient oil/spray; non-stick coating damaged; not preheated properly.	Ensure plates are lightly oiled or sprayed before each use. Allow the unit to fully preheat until the indicator light signals readiness. Avoid using metal utensils.
Waffles are too light or too dark.	Incorrect temperature setting.	Adjust the thermostat control knob to a higher setting for darker waffles or a lower setting for lighter waffles.
Steam escaping from the unit.	Normal during cooking process.	This is normal as moisture cooks out of the batter. Do not open the lid frequently during cooking.

Specifications

Model Number:	HCRBW7SS
Brand:	Nostalgia
Power:	1000 Watts
Voltage:	120 Volts
Material:	Aluminum, Stainless Steel
Color:	Stainless Steel
Product Dimensions:	19.99 x 25.2 x 11.4 cm

Item Weight:	1.46 kg

Warranty and Support
