- 1 x Stainless Steel Base with Adjustable Temperature Control Dial
- 1 x Stainless Steel Support Ring / Splash Guard
- 8 x Color-Coded Stainless Steel Fondue Forks

Setup

1. **Unpack:** Carefully remove all components from the packaging.

2. **Initial Cleaning:** Before first use, wash the fondue pot, support ring, and fondue forks with warm, soapy water. Rinse thoroughly and dry completely. Wipe the electric base with a damp cloth. Do not immerse the electric base in water.
3. **Assembly:**
    - Place the electric base on a stable, heat-resistant surface.
    - Place the stainless steel fondue pot onto the electric base. Ensure it sits securely.
    - Position the stainless steel support ring on top of the fondue pot. This ring acts as a splash guard and holds the fondue forks in place.
4. **Power Connection:** Ensure the temperature control dial on the base is set to the "OFF" position before plugging the unit into a standard electrical outlet.

Operating Instructions

Preparing Your Fondue:

1. **Add Ingredients:** Pour your desired fondue ingredients (e.g., chocolate, cheese, oil, broth) into the stainless steel fondue pot. Do not overfill; ensure there is enough space to prevent overflow when dipping. The pot has an 8-cup capacity.
2. **Set Temperature:** Plug the unit into an electrical outlet. Turn the adjustable temperature control dial to your desired heat setting. The blue-lit indicator light will illuminate when the unit is heating. For melting chocolate or cheese, start with a medium setting and adjust as needed to maintain a smooth, consistent temperature.
3. **Heating:** Allow the fondue to heat thoroughly. Stir occasionally, especially for cheese or chocolate, to ensure even melting and prevent scorching.

Using the Fondue Pot:

- Use the color-coded fondue forks to dip your desired food items into the fondue. The color-coded handles help each user identify their own fork.
- The support ring helps to prevent splashing and provides a convenient resting place for the fondue forks.
- Adjust the temperature dial as necessary to keep the fondue at the ideal consistency and warmth throughout your meal.
- When finished, turn the temperature dial to "OFF" and unplug the unit from the outlet. Allow the unit to cool completely before cleaning.

- **Electric Base:** The electric base should never be immersed in water or other liquids. To clean, wipe the exterior with a damp cloth and mild detergent. Dry thoroughly.
- **Stubborn Residue:** For stubborn food residue in the pot, fill it with warm, soapy water and let it soak for a period before cleaning. A non-abrasive sponge or cloth is recommended.
- **Storage:** Ensure all parts are clean and dry before storing. Store the fondue set in a cool, dry place, preferably in its original packaging to protect components.

Troubleshooting

Problem	Possible Cause	Solution
Unit not heating or indicator light off.	Not plugged in, power outlet issue, temperature dial set to OFF.	Ensure unit is securely plugged into a working outlet. Check temperature dial is set to a heat setting.
Fondue not melting or heating slowly.	Temperature setting too low, too much cold ingredient added at once.	Increase temperature setting. Add ingredients gradually if starting with cold items. Stir frequently.
Fondue scorching or burning.	Temperature setting too high, insufficient stirring.	Decrease temperature setting. Stir fondue continuously, especially for chocolate or cheese.
Fondue forks slipping.	Support ring not properly seated.	Ensure the support ring is correctly placed on the rim of the fondue pot.
