SONICWALL CASE STUDY

Delhivery

Introduction

This case study of Delhivery is based on a July 2020 survey of SonicWall customers by TechValidate, a 3rd-party research service.

"The TZ570 is easy to onboard, use, and manage, and has an easy wizard and clear menus. I love to use SonicWall products, and really appreciate the support which SonicWall has extended."
— Gaurav Pandey, Head IT, Delhivery

Challenges

Delhivery initially evaluated the new TZ570 in beta in a production environment. In addition to the firewall, the large-enterprise transportation services company also had the following SonicWall products deployed in their network:

- Capture Client
- Capture Security Center (CSC)
- Global Management System (GMS)

Use Case

Pandey onboarded the firewall using the SonicWall Capture Security Center. He loved the new SonicExpress mobile app and new user interface, and both worked seamlessly.

Pandey reports that configuring the firewall in the new SonicOS UI was easy and simple, and that it has been easy and simple to monitor the firewall or make changes, such as creating rules, objects, and policies.

Results

For Pandey, the most beneficial features of the new TZ570 appliance were:

- Zero-Touch deployment
- SD-WAN
- TLS 1.3 support

"I'm a fan of SonicWall," says Pandey. He found the new TZ570 using SonicOS 7.0 easier to onboard and manage than prior-generation appliances. Plus, it was noticeably faster, very stable, and had enhanced the company's threat protection.

EMC Emissions Class refers to one of the following use environments:

- EMC Class B products are intended for use in residential/domestic environments but may also be used in non-residential/non-domestic environments.
- EMC Class A products are intended for use in non-residential/non-domestic environments. Class A products may also be utilized in residential/domestic environments but may cause interference and require the user to take adequate corrective measures.

For Product Safety and EMC compliance, this product has been assigned a unique regulatory model and regulatory type that is imprinted on the product labeling to provide traceability to the regulatory approvals noted on this datasheet. This datasheet applies to any product that utilizes the assigned regulatory model including marketing names other than those listed on this datasheet.

ErP compliance is tied to the CE mark. This product (Network Security Appliance) is currently out of scope of all implementing measures.

REACH (Registration, Evaluation, Authorization and Restriction of Chemicals, 1907/2006) is the European Union's (EU) chemical substances regulatory framework.
