## MAINTENANCE AND CARE

To ensure the longevity and optimal performance of your SHASHIBO cube, follow these simple care instructions:

- **Cleaning:** Wipe the cube with a soft, dry, or slightly damp cloth. Avoid using harsh chemicals or abrasive cleaners, as these can damage the surface finish and artwork.
- **Storage:** Store the cube in a clean, dry place away from extreme temperatures and direct sunlight.
- **Handling:** While durable, avoid excessive force or dropping the cube from significant heights, as this could potentially damage the internal magnetic structure or the plastic casing.
- **Magnets:** The rare earth magnets are strong and securely embedded. Do not attempt to disassemble the cube, as this may damage the product and void any potential warranty.

## TROUBLESHOOTING

The SHASHIBO cube is designed for reliability. However, if you encounter any issues, refer to the following common solutions:

Problem	Possible Cause	Solution

Magnets don't seem to hold shapes well.	Incorrect alignment; extreme temperature exposure.	Ensure the cube sections are properly aligned for the desired shape. Avoid storing in very hot or cold environments. If the issue persists, contact customer support.
