MAINTENANCE

Proper maintenance ensures the longevity and optimal performance of your projector:

- **Cleaning the Lens:** Use a soft, dry, lint-free cloth to gently wipe the projector lens. Avoid using abrasive cleaners or solvents.
- **Cleaning Air Vents:** Regularly check and clean the air vents to prevent dust buildup, which can lead to overheating. Use a soft brush or a vacuum cleaner with a brush attachment.
- **Storage:** When not in use for extended periods, store the projector in a cool, dry place, away from direct sunlight and extreme temperatures.

TROUBLESHOOTING

If you encounter issues with your projector, try the following common troubleshooting steps:

- **No Power:**
 - Ensure the power cord is securely connected to both the projector and the electrical outlet.
 - Verify the electrical outlet is functioning by plugging in another device.
- **No Image:**
 - Check that the correct input source is selected on the projector.
 - Ensure the HDMI cable (or other video cable) is securely connected to both the projector and the source device.
 - Verify the source device is powered on and outputting a signal.
- **Blurry Image:**
 - Adjust the focus using the projector's settings menu.
 - Ensure the projector is placed at an appropriate distance from the screen or wall.
 - Check for any obstructions in front of the lens.
- **No Sound:**
 - Increase the volume on both the projector and the source device.
 - Check the audio output settings on your source device to ensure it's sending audio via HDMI.
 - If using external speakers, ensure they are properly connected and powered on.
