Solatec SL-8

Solatec Plug-in LED Night Light Instruction Manual

Model: SL-8

INTRODUCTION

Thank you for choosing the Solatec Plug-in LED Night Light. This manual provides essential information for the safe and efficient use of your new night light. Please read these instructions carefully before installation and operation, and retain them for future reference.

SAFETY INFORMATION

- For indoor use only.
- Do not expose to water or moisture.
- Do not disassemble or modify the device.
- Ensure the electrical outlet is clean and dry before plugging in.
- Keep out of reach of children.

PACKAGE CONTENTS

- 6 x Solatec Plug-in LED Night Lights

SETUP

1. Unpack the Solatec LED Night Light from its packaging.
2. Locate a standard 120V AC electrical outlet in your desired indoor location (e.g., bathroom, hallway, bedroom, kitchen, stairway, nursery).
3. Plug the night light directly into the outlet. The compact design ensures it does not obstruct the second outlet.

Image: The Solatec LED Night Light is designed to plug directly into a standard wall outlet, leaving the second receptacle free for other devices.

OPERATING INSTRUCTIONS

The Solatec LED Night Light features an automatic dusk-to-dawn sensor and adjustable settings for brightness and color temperature.

Automatic Dusk-to-Dawn Sensor

- The night light will automatically turn **ON** when ambient light is insufficient (e.g., at night or in a dark room).
- It will automatically turn **OFF** when sufficient ambient light is detected (e.g., during the day).

Adjustable Brightness

The night light offers two brightness modes: Bright and Dim. A switch located on the device allows you to select your preferred brightness level.

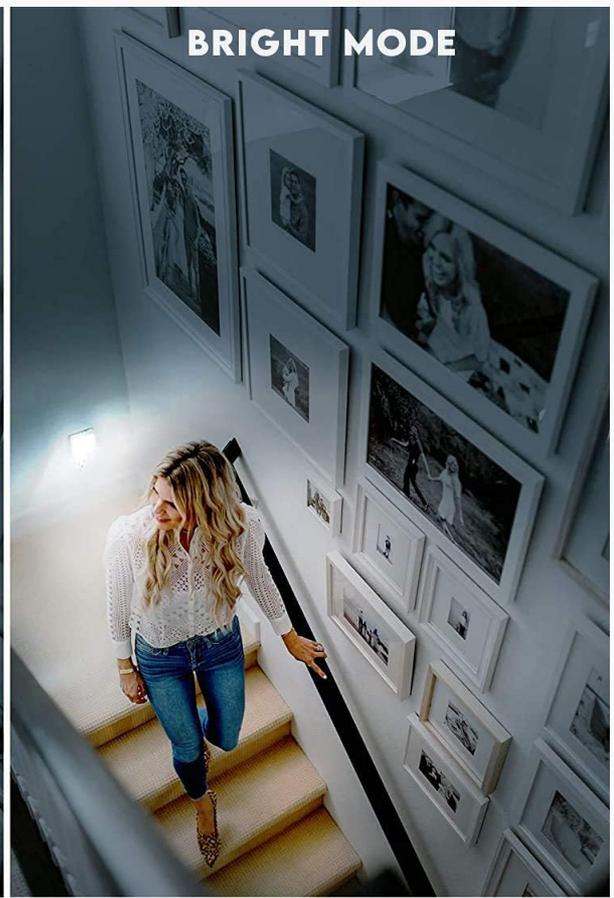

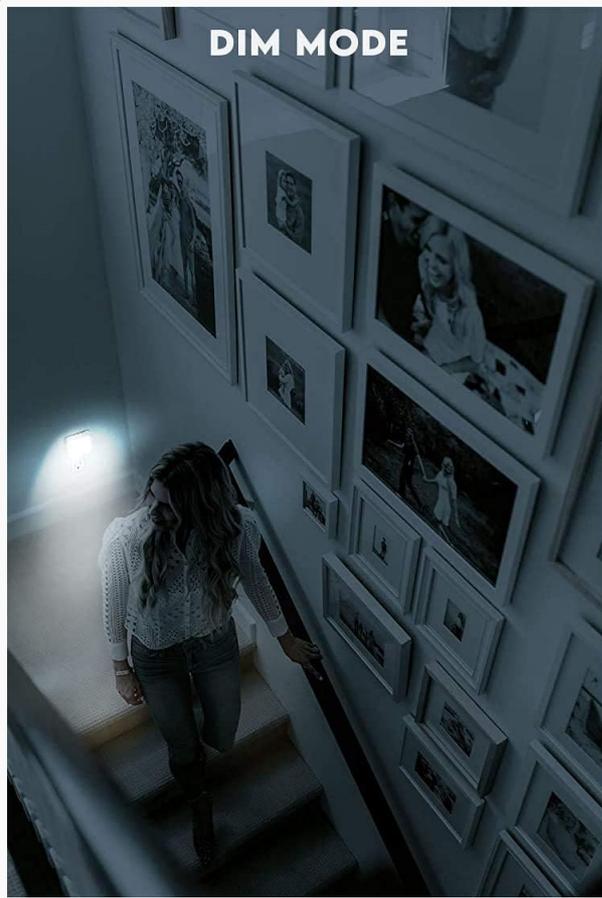

Image: The night light features two switches for adjusting brightness (Bright/Dim) and color temperature (Cool White/Warm White).

Adjustable Color Temperature

You can choose between Warm White (3000K) and Cool White light. A separate switch on the device allows you to toggle between these two color options to suit your preference or room ambiance.

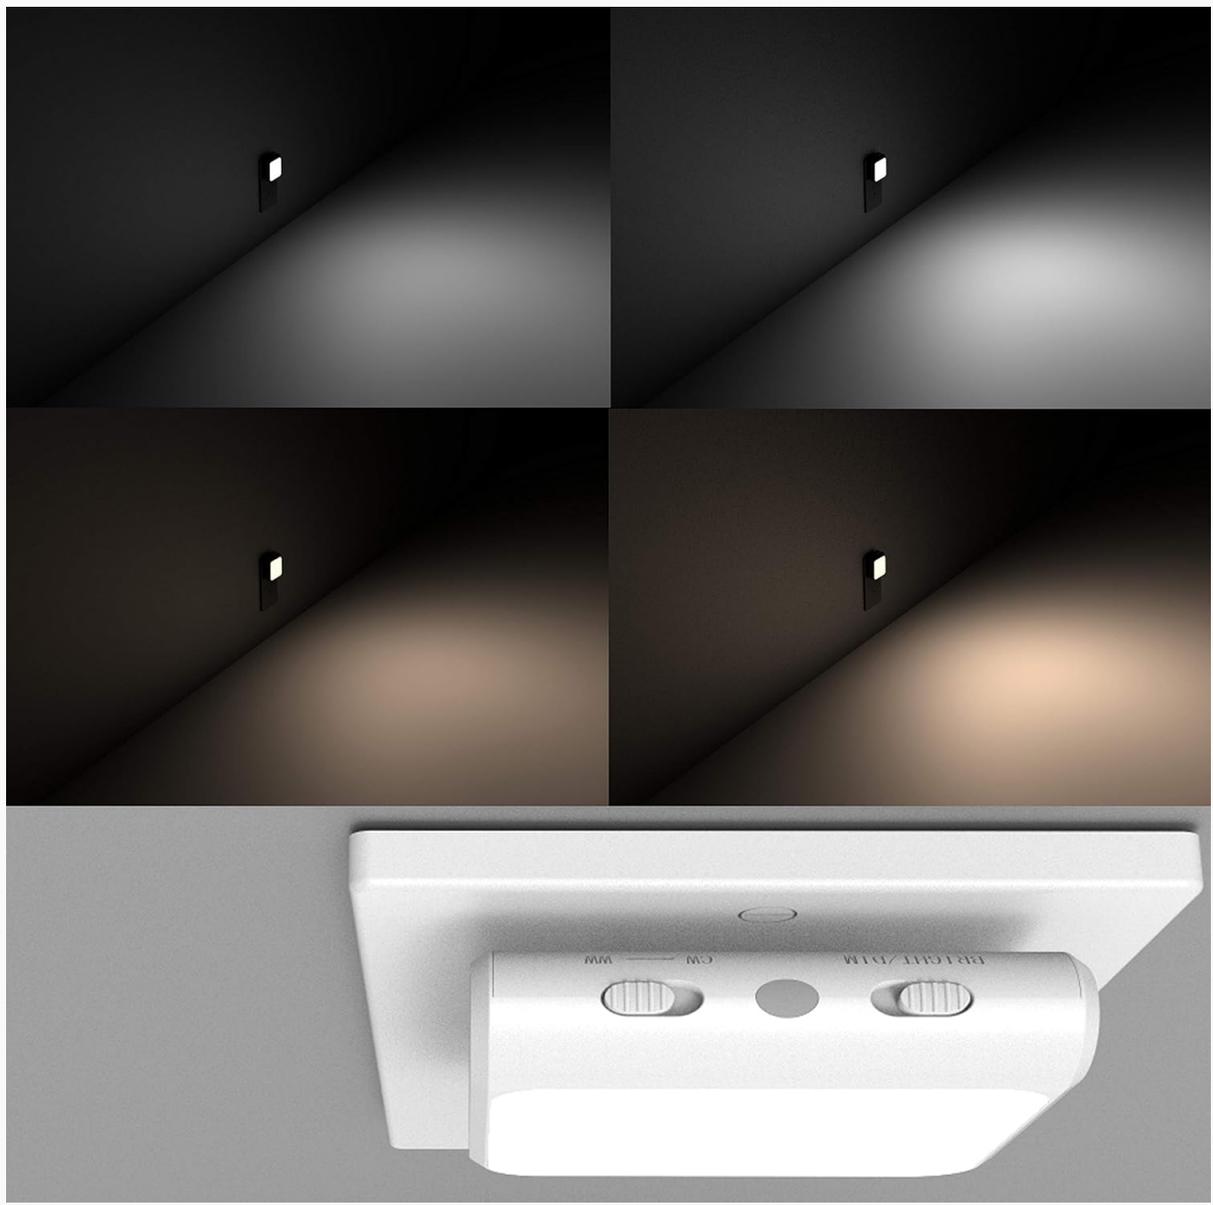

Image: The night light can be set to various combinations of brightness and color, including dim warm white, bright warm white, dim cool white, and bright cool white.

MAINTENANCE

- To clean the night light, unplug it from the outlet and wipe it with a soft, dry cloth.
- Do not use abrasive cleaners or solvents.
- The LED bulbs are designed for long-term use (20,000+ working hours) and are not user-replaceable.

TROUBLESHOOTING

- **Light does not turn on automatically:** Ensure the ambient light sensor (small dot on the front) is not obstructed. Test in a darker environment.
- **Light does not turn off automatically:** Ensure the ambient light sensor is not obstructed and there is sufficient light in the room.
- **Brightness or color not changing:** Verify that the switches on the device are correctly set to your desired mode.
- **No light:** Check if the night light is securely plugged into a functioning electrical outlet.
