moisture, as this may damage the faux suede material.

- **Odor:** As mentioned in Setup, any slight initial smell should dissipate over time in a well-ventilated area.

7. TROUBLESHOOTING

This section addresses common concerns you might encounter.

Issue	Possible Cause / Solution
Cord has a slight smell.	This is normal for faux cords. Place the cord in a well-ventilated area for a short period; the smell will dissipate.
Difficulty stringing beads.	Ensure the bead holes are large enough for a 3mm cord. Some beads may have smaller holes. Consider using a bead reamer if necessary, or select beads with larger openings.
Cord appears slightly different in color than expected.	Colors may exist a slight difference due to different screen settings or lighting conditions during photography. This is a common occurrence with product imagery.

8. SAFETY INFORMATION

Please observe the following safety precautions:

- **Winding Risk:** The long cord presents a winding risk. Keep the product away from children under 3 years old to prevent entanglement or strangulation hazards.
- **Not for Consumption:** This product is a crafting material and is not intended for consumption.
- **Sharp Tools:** When cutting the cord, use appropriate sharp tools (scissors, craft knife) with caution to avoid injury.
