Yaheetech 7.5ft Artificial Full Spruce Christmas Tree Instruction Manual

Model: YT-591870

INTRODUCTION

This manual provides detailed instructions for the assembly, operation, and maintenance of your Yaheetech 7.5ft Artificial Full Spruce Christmas Tree. Please read these instructions carefully before setup to ensure proper use and longevity of your product. This artificial tree is designed to provide a festive atmosphere for your home, office, or party decorations.

SAFETY INFORMATION

- Ensure the tree is placed on a flat, stable surface to prevent tipping.
- Keep the tree away from open flames, heat sources, and direct sunlight.
- Do not overload the branches with excessive or heavy ornaments.
- The tree branches and tips are made of fire-resistant PVC material. However, this does not mean the tree is fireproof. Exercise caution with electrical decorations.
- It is recommended to wear gloves during assembly and fluffing to protect hands from potential minor scratches from the branch tips.
- This product is for indoor and outdoor holiday decoration.

PACKAGE CONTENTS

Before beginning assembly, verify that all components are present:

- Tree sections (typically 3 sections, labeled 1, 2, 3)
- Foldable Metal Stand
- Screws for stand assembly

Simple Set-Up

Quality Materials

Foldable Metal Stand

SETUP INSTRUCTIONS

Follow these steps to assemble your artificial Christmas tree:

1. **Assemble the Stand:** Unfold the metal stand and insert the provided screws to secure it firmly. Ensure the stand is stable and all legs are evenly spread. The four feet of the stand are covered by rubber to prevent floor scratches.
2. **Insert Tree Section 3:** Locate the tree section labeled '3' (the widest section). Insert it into the center hole of the assembled stand.
3. **Insert Tree Section 2:** Take the tree section labeled '2' and insert it into the top of section 3.
4. **Insert Tree Section 1:** Finally, insert the tree section labeled '1' (the narrowest, top section) into the top of section 2.
5. **Fluff the Branches:** Once all sections are connected, begin to fluff out the branches. This process involves gently bending and spreading each individual branch tip to create a full and natural appearance.

Start from the bottom section and work your way up. The fluffing procedure typically includes two steps: lifting the top tips and pulling out the side tips. This step is crucial for achieving the tree's intended fullness.

OPERATING INSTRUCTIONS

Your Yaheetech Artificial Full Spruce Christmas Tree is designed for ease of use and customization.

Fluffing for Fullness

The tree's branches are flexible and can be bent to achieve a full, dense appearance. After initial assembly, dedicate 1.5-2 hours to carefully fluff out all 1011 PVC branch tips. This involves separating and positioning each tip to fill any gaps and create a natural silhouette. The more time spent on fluffing, the fuller your tree will appear.

Decorating Your Tree

The lush spruce branches provide ample space for your chosen decorations and lights. You can customize the tree with various ornaments, garlands, and lighting to match your holiday theme. Ensure decorations are evenly distributed and do not place excessive weight on any single branch.

MAINTENANCE

Cleaning

To clean your artificial Christmas tree, gently wipe the branches and tips with a soft, dry cloth. For more stubborn dust, a slightly damp cloth can be used, followed by immediate drying. Do not use harsh chemicals or abrasive cleaners, as these may damage the PVC material.

Storage

When the holiday season concludes, disassemble the tree in reverse order of assembly. The foldable metal stand allows for easy storage, saving space. Compress the branches as much as possible without causing damage. Store all tree sections and the stand in their original packaging or a suitable storage bag in a cool, dry place away from direct sunlight and extreme temperatures.

TROUBLESHOOTING

Tree Does Not Look Full

If your tree does not appear as full as expected, it is likely due to insufficient fluffing. The branches are compressed for packaging. Revisit the 'Fluffing for Fullness' section under Operating Instructions and spend additional time carefully spreading and shaping each branch tip. This process can take 1.5-2 hours for a 7.5ft tree to achieve optimal fullness.

SPECIFICATIONS

Feature	Detail
Brand	Yaheetech
Model Number	YT-591870
Product Dimensions	51.57"D x 51.57"W x 89.76"H (approx. 7.5ft height)
Color	Green
Material	Iron, Polyvinyl Chloride (PVC)
Item Weight	17.7 Pounds
Tip Count	1011
Special Feature	Bendable Branch
Base Type	Foldable Metal Stand
Assembly Required	Yes
