SETUP AND INSTALLATION

This mirror can be installed either horizontally or vertically. Professional installation is recommended for electrical wiring.

Mounting Steps:

- Prepare the Wall:** Mark the desired position for the mirror. Ensure the wall can support the mirror's weight (approximately 20.3 lbs).
- Drill Holes:** Drill holes at the marked positions for the mounting screws. Insert wall anchors if necessary.
- Secure Mounting Plate:** Attach the mounting plate to the wall using the provided screws.
- Electrical Connection:** Connect the mirror's electrical wires to your household wiring. Ensure power is off at the circuit breaker before making connections. Consult a qualified electrician if you are unsure.

5. **Hang the Mirror:** Carefully hang the mirror onto the mounting plate, ensuring it is securely seated.

OPERATING INSTRUCTIONS

Touch Switch Operation:

- **Power On/Off:** Double-tap the touch switch to turn the light on or off.
- **Adjust Color Temperature:** Short press the touch switch to cycle through color temperatures: 6000K (White Light), 4500K (Natural Light), and 3000K (Warm Light).
- **Adjust Brightness:** Long press the touch switch to adjust the brightness continuously from 10% to 100%. Release when the desired brightness is reached.

Wall Switch Recommendation:

For convenience, it is recommended to connect the mirror to a wall switch to control the light and defogger (if applicable) ON/OFF. The mirror's internal memory function will retain your last brightness setting when powered off via a wall switch.

Short Press The Touch Switch To Adjust Color Temperature.

MAINTENANCE

To maintain the mirror's appearance and functionality, follow these cleaning guidelines:

- Always disconnect power before cleaning.
- Use a soft, damp cloth with a mild glass cleaner.
- Avoid abrasive cleaners, solvents, or harsh chemicals that may damage the mirror surface or electrical components.
- Wipe dry immediately with a clean, lint-free cloth to prevent water spots.

TROUBLESHOOTING

Problem	Possible Cause	Solution
---------	----------------	----------

Problem	Possible Cause	Solution
Mirror light does not turn on.	No power supply; loose wiring; faulty touch switch.	Check circuit breaker. Ensure all wiring connections are secure. Contact customer support if the touch switch is unresponsive.
Light flickers or is dim.	Low voltage; faulty LED driver.	Verify power supply voltage. Contact customer support for LED driver replacement.
Touch switch is unresponsive.	Power issue; sensor malfunction.	Ensure power is connected. Try cycling power at the circuit breaker. If issue persists, contact customer support.
