2. Activate NFC and Install NFC Application:

If your smartphone has NFC, ensure the NFC switch is turned on. Then, search your phone's app store for NFC-compatible applications. Download and install a suitable NFC application to manage your smart ring's functions.

3. Initiate NFC Application:

Launch the installed NFC application and follow the on-screen instructions to configure your smart ring.

4. Proper Ring Placement for Reading/Writing:

NFC is a near-field communication technology. For successful data reading or writing, ensure the top side of the smart ring's chip is placed directly and closely to your smartphone's NFC detection area. Improper placement may

result in reading or writing failures.

5. OPERATING INSTRUCTIONS

5.1. Storing and Exchanging Information

Using your NFC application, you can program the smart ring to store various types of personal information, such as contact details, website links, or social media profiles. This information can then be quickly shared with other NFC-enabled devices by simply touching the ring to the device's NFC area.

5.2. Application Lock/Unlock

To enhance your privacy, the smart ring can be configured to lock and unlock specific applications on your smartphone:

1. Within your NFC application, select the desired application(s) you wish to lock or unlock.
2. Write this configuration to your smart ring.
3. To activate or deactivate the lock, simply touch the smart ring to your phone's NFC area. The application will then respond according to the programmed setting.

Lock / unlock the program, select the application you want to lock / unlock, write the smart ring, only the ring touch the phone to start the application, to protect personal privacy.
