Yaheetech Lift-Top Coffee Table with Hidden Storage, White

Model: YA-00098882

INTRODUCTION

Thank you for choosing the Yaheetech Lift-Top Coffee Table. This versatile and modern coffee table is designed to enhance your living space with its functional lift-top mechanism, hidden storage compartment, and additional lower shelf. Its clean white finish and sturdy construction make it a practical and stylish addition to any home or office.

This manual provides detailed instructions for assembly, operation, maintenance, and troubleshooting to ensure you get the most out of your new furniture. Please read it carefully before assembly and retain it for future reference.

SAFETY INFORMATION

- Always follow the assembly instructions carefully.
- Ensure all screws and fasteners are securely tightened before use. Periodically check and re-tighten as needed.
- Do not exceed the maximum weight recommendation of **35 kg (77 lbs)** for the tabletop.
- When lifting or lowering the tabletop, ensure hands and fingers are clear of the mechanism to prevent pinching.
- Avoid placing hot items directly on the surface without protection.
- Keep small parts away from children during assembly to prevent choking hazards.
- This product is intended for indoor use only.

ASSEMBLY INSTRUCTIONS

Recommended Tool: Screwdriver (not included).

Note: Assembly of the tabletop mechanism may require two people for ease and safety.

- Unpack and Identify Parts:** Carefully remove all components from the packaging. Lay them out on a clean, soft surface to prevent scratches. Identify each part using the provided diagram (if available) and the package contents list.
- Assemble the Base Frame:** Attach the side panels to the base panel using the provided hardware (e.g., screws, dowels, cam locks). Ensure all connections are snug.
- Install the Lift Mechanism:** Secure the metal lift mechanism to the inner frame of the table according to the instructions. Ensure it is oriented correctly and all screws are tightly fastened.
- Attach the Tabletop:** With assistance, carefully align the tabletop panel with the lift mechanism. Secure the tabletop to the mechanism using the designated screws. This step often requires two people to hold the top steady while attaching.
- Apply Protective Pads:** Attach the protective pads to the bottom of the table legs and to the inner corners where the tabletop rests when closed. These pads help prevent scratches and cushion the closing of the lift-top.
- Final Check:** Once assembled, gently test the lift-top mechanism to ensure smooth operation. Verify that all connections are secure and the table is stable.

OPERATING INSTRUCTIONS

Using the Lift-Top Mechanism:

1. **To Lift:** Gently pull the front edge of the tabletop upwards. The pneumatic lift mechanism will assist in smoothly raising the top to your desired height.
2. **To Lower:** With both hands, gently push the tabletop downwards. The mechanism will slowly guide the top back into its closed position. Ensure no objects or body parts are in the way during lowering.

Accessing Hidden Storage:

When the tabletop is lifted, the spacious hidden compartment beneath becomes accessible. This area is ideal for storing remote controls, magazines, laptops, or other items you wish to keep out of sight.

Using the Lower Shelf:

The open lower shelf provides additional storage or display space for books, decorative items, or baskets.

MAINTENANCE

- **Cleaning:** Wipe the table surface with a soft, damp cloth. The water-resistant finish allows for easy cleaning of spills. Avoid using harsh chemicals or abrasive cleaners, which can damage the finish.
- **Dusting:** Regularly dust the table with a dry, soft cloth.
- **Mechanism Care:** The lift mechanism is designed for durability. If it becomes stiff over time, a small amount of silicone-based lubricant can be applied to the moving parts, avoiding contact with wood surfaces.
- **Tightening:** Periodically check all screws and fasteners and re-tighten them to ensure the table remains stable and secure.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Table is wobbly/unstable	Loose fasteners or uneven floor.	Check and tighten all screws. Ensure the table is on a level surface. Adjust protective pads if necessary.
Lift-top mechanism is stiff or noisy	Lack of lubrication or minor misalignment.	Apply a small amount of silicone-based lubricant to the moving joints of the mechanism. Ensure no objects are obstructing the movement.
Tabletop does not close flush	Obstruction in the storage compartment or misalignment.	Remove any items from the storage compartment that might be preventing closure. Check the alignment of the tabletop with the frame.
