Speedypress 71HD-Silver

Speedypress 71HD Steam Ironing Press User Manual

Model: 71HD-Silver | Brand: Speedypress

1. INTRODUCTION

Thank you for choosing the Speedypress 71HD Steam Ironing Press. This professional-grade appliance is engineered for superior ironing performance, significantly reducing ironing time by up to 75% compared to traditional irons. Its robust design and advanced features ensure excellent results for a wide range of fabrics and garments, from delicate items to large household linens.

The 71HD model boasts a large ironing surface, powerful steam bursts, and intuitive digital controls, making it an ideal solution for busy households and light commercial environments. Please read this manual thoroughly before first use to ensure safe and efficient operation.

2. IMPORTANT SAFETY INSTRUCTIONS

To ensure safe operation and prevent damage to the appliance or injury to yourself, please observe the following safety guidelines:

- **Automatic Shut-off:** The press is equipped with safety features that automatically shut off the heating elements. If the press remains in a closed position for 15 seconds, it will automatically power down. If left inactive for 15 minutes in an open position, it will also shut off.
- **Overheating Protection:** Internal protection mechanisms are in place to prevent the machine from overheating during prolonged use.
- **Fabric Protection:** The handle automatically lifts to safely protect fabrics from potential overheating if left unattended during pressing.
- **Mineral Control System:** An electronic mineral control system tests water quality before pumping to ensure it is pure enough, preventing compromise to performance or safety.
- Always unplug the appliance when not in use, before cleaning, or before adding water.
- Do not immerse the appliance in water or any other liquid.
- Keep out of reach of children and pets.
- Use only as directed in this manual.

3. SETUP

Follow these steps for the initial setup of your Speedypress 71HD:

1. **Unpack the Press:** Carefully remove the ironing press from its packaging. Retain all packaging materials for future storage or transport.
2. **Placement:** Place the press on a stable, flat, heat-resistant surface. Ensure there is adequate space around the unit for safe operation.
3. **Fill Water Tank:** Locate the removable water tank. Pull it out completely from the unit. Fill the tank with clean tap water. The tank has a large capacity of 800 ml. The clear tank indicator shows the water level. The tank can be refilled even while the press is in use.
4. **Insert Anti-Scale Filter:** Ensure the unique anti-scale filter cartridge is properly inserted into the water tank. This filter prolongs the life of the machine and its steam function.
5. **Connect Power:** Plug the power cord into a suitable electrical outlet. The press operates at 1600 watts.
6. **Initial Heating:** Turn on the press. The unit has a fast heat-up time, reaching operating temperature and being ready for steam in just 2 minutes.

Figure 3.1: Filling the removable water tank. The tank can be easily removed for refilling.

Removable Water Tank

- ✓ Longer lasting heating element
- ✓ High quality steam pump
- ✓ Anti scale cartridge

4. OPERATING INSTRUCTIONS

The Speedypress 71HD is designed for ease of use, offering both dry and steam pressing options.

4.1 Controls and Settings

The press features clear and simple digital touch controls for pressure and temperature. The electronic control allows for precise ironing temperature adjustments within a range of approximately 60°C to 200°C.

Figure 4.1: The digital control panel for temperature and steam settings.

4.2 Pressing Operations

- **Dry Pressing:** The press can be used without steam for dry ironing. Simply select the desired temperature setting.
- **Steam Pressing:** For steam ironing, ensure the water tank is filled. The press provides a powerful automatic steam output of 90g per minute, with a booster output of 120g per minute. Steam is automatically emitted when the handle is pressed down to a half-closed position.
- **Pressure Application:** The press applies its own pressure to the garment, equivalent to 50 kg (or 25g per cubic meter). Only fingertip pressure is required on the handle.
- **Large Opening Angle:** The press features a wide opening angle, providing ample space for bulky fabrics and large items like double sheets, and helping to prevent user injury.
- **Ironing Multiple Layers:** The press is capable of ironing multiple layers of fabric simultaneously, further speeding up the process.

4.3 Integrated Iron Accessory

The Speedypress 71HD includes an integrated iron accessory, useful for ironing small creases and intricate areas that are difficult to reach with the main press surface, such as shirt buttons and zippers.

Figure 4.4: A closer view of the integrated iron accessory.

5. MAINTENANCE

Proper maintenance will ensure the longevity and optimal performance of your Speedypress 71HD.

- **Water Tank:** The water tank is fully removable for easy refilling and cleaning. Regularly empty and clean the tank to prevent mineral buildup.
- **Anti-Scale Filter:** The unique anti-scale filter cartridge is designed to prolong the life of the machine and its steam function. The cartridge is very easy to replace. Replace the filter cartridge periodically as indicated by the machine or when you notice a decrease in steam performance.
- **Cleaning the Ironing Plate:** Allow the ironing plate to cool completely. Wipe the plate with a damp cloth. For stubborn residues, use a specialized iron cleaner according to its instructions.

- **Cover and Foam Felt:** The press comes with a waterproof and washable cover. Regularly clean or replace the cover and the foam felt padding to maintain optimal ironing results.

6. TROUBLESHOOTING

If you encounter issues with your Speedypress 71HD, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Press does not heat up.	Not plugged in; power switch off; circuit breaker tripped.	Ensure the power cord is securely plugged into a working outlet. Check the power switch on the unit. Reset the circuit breaker if necessary.
No steam or insufficient steam.	Water tank empty; anti-scale filter clogged; unit not hot enough; steam button not activated.	Refill the water tank. Replace the anti-scale filter cartridge. Allow the unit to fully heat up (2 minutes). Ensure the handle is pressed to the half-closed position to activate automatic steam.
Water dripping from the ironing plate.	Unit not hot enough; overfilled water tank; incorrect temperature setting for steam.	Allow the press to reach full operating temperature before using steam. Ensure the water tank is filled to the MAX line, not overfilled. Select the appropriate temperature for steam ironing.
Fabric sticking to the ironing plate.	Residue on the plate; temperature too high for fabric type.	Clean the ironing plate as described in the Maintenance section. Adjust the temperature setting according to the fabric type.

If the problem persists after attempting these solutions, please contact customer support.

7. TECHNICAL SPECIFICATIONS

Feature	Specification
Brand	Speedypress
Model Number	71HD-Silver
Color	Silver
Power	1600 Watts
Ironing Surface Size	68 x 27.5 cm
Product Weight	11 kg
Package Dimensions	72 x 64 x 32 cm
Water Tank Capacity	800 ml
Automatic Steam Output	90 g/min
Booster Steam Output	120 g/min
Heat-up Time	Approx. 2 minutes
Temperature Range	Approx. 60°C - 200°C
Pressing Pressure	Equivalent to 50 kg
Recommended Max Use	200 hours per year (manufacturer)
