Westcott iPoint Aura Battery Pencil Sharpener (Model 17319) User Manual

Model: 17319 | Brand: Westcott

PRODUCT OVERVIEW

The Westcott iPoint Aura Battery Pencil Sharpener is designed for efficient and precise pencil sharpening. It features a space-saving vertical design, durable titanium-bonded blades, and an auto-stop mechanism to prevent over-sharpening. The sharpener includes an EZ-view shavings reservoir and a new pop-top canister for convenient emptying.

SETUP

1. **Unpack the Sharpener:** Carefully remove the sharpener from its packaging.
2. **Install Batteries:**
 - Locate the battery compartment on the bottom of the sharpener.
 - Open the battery compartment cover.
 - Insert 4 AA batteries, ensuring correct polarity (+/-).
 - Close the battery compartment cover securely.

3. **Placement:** Place the sharpener on a stable, flat surface.

OPERATING INSTRUCTIONS

1. **Insert Pencil:** Gently insert a standard-sized pencil into the sharpening hole.
2. **Apply Light Pressure:** Apply light downward pressure to activate the sharpening mechanism. The sharpener will begin to operate.
3. **Auto-Stop Feature:** The sharpener is equipped with an auto-stop feature. It will automatically stop sharpening once a perfect point is achieved, preventing over-sharpening and conserving pencil length.
4. **Remove Pencil:** Once the sharpener stops, remove the pencil. Do not force the pencil out while the motor is running.

MAINTENANCE

1. Emptying Shavings Reservoir:

- The EZ-view shavings reservoir allows you to see when it needs emptying.
- To empty, press the 'Press' button on the top of the sharpener to release the pop-top canister.
- Carefully remove the canister and discard the pencil shavings.
- Replace the canister securely until it clicks into place.

2. **Blade Care:** The sharpener uses proprietary Titanium Bonded blade technology, designed to stay sharper 3x longer. No special maintenance is required for the blades under normal use. Avoid sharpening non-pencil items to maintain blade integrity.

Video: This video offers an honest review focusing on the pop-top feature of the Westcott Pencil Sharpener, demonstrating how to empty shavings.

TROUBLESHOOTING

• Sharpener Not Turning On:

- Check if the batteries are installed correctly with the right polarity.
- Replace old batteries with new AA batteries.
- Ensure the shavings canister is securely closed. The sharpener may have a safety mechanism that prevents operation if the canister is open or improperly seated.

• Pencil Not Sharpening or Uneven Sharpening:

- Ensure the pencil is inserted straight into the sharpening hole.
- Check if the shavings reservoir is full and empty it if necessary. A full reservoir can obstruct the sharpening mechanism.
- Inspect the blades for any debris or damage. If damaged, the unit may require replacement.

• Pencil Lead Breaking Frequently:

- Avoid applying excessive pressure when sharpening. The auto-stop feature works best with light pressure.
- Ensure you are using standard graphite or colored pencils. Avoid sharpening crayons or other soft materials not intended for this sharpener.

SPECIFICATIONS

Brand	Westcott
Model Number	17319
Power Source	Battery Powered (4x AA batteries, not included)
Material	Metal, Plastic
Specific Uses	Color Pencil, Graphite Pencil
Additional Features	Automatic Stop, EZ-view shavings reservoir, Pop-top canister, Titanium Bonded blades
Unit Count	1.0 Count

Target Audience	Office Worker, Student
