Pairing Instructions

- 1. Initial Pairing (Wired):** For the first connection, use the included USB cable to connect the controller directly to your PlayStation 4 console or PC. This will establish the initial connection and register the controller with the device.
- 2. Wireless Connection:** After initial pairing, disconnect the USB cable. The controller should automatically connect wirelessly. A stable wireless connection can be maintained up to 33 feet (10 meters).
- 3. Pairing with Android/iPhone:** Specific pairing instructions for Android and iPhone devices may vary. Generally, enable Bluetooth on your mobile device, put the controller into pairing mode (refer to device-specific instructions if available, typically holding down the SHARE and PS buttons simultaneously until the light bar flashes), and select the controller from the list of available Bluetooth devices.
