IMPORTANT SAFETY INSTRUCTIONS

- Always ensure the juicer is placed on a stable, flat surface before operation.
- Do not operate the juicer with wet hands or near water.
- Keep hands and utensils away from moving parts during operation.
- Unplug the appliance from the power outlet when not in use, before assembling or disassembling parts, and before cleaning.
- Avoid using hard or fibrous ingredients like Amla and sugarcane, as they may damage the juicer.
- If you notice a burning smell during the first use, this is normal due to the motor varnish heating. If it persists after initial uses, contact customer support.
- Do not immerse the motor unit in water or any other liquid.
- This appliance is for household use only.

SETUP AND ASSEMBLY

Before using your Rico Electric Juicer for the first time, follow these steps:

1. **Unpack:** Carefully remove all components from the packaging.
2. **Clean:** Wash all removable parts (juice collector, pulp collector, lid, filter, pusher) with warm soapy water. Rinse thoroughly and dry completely. The main motor unit should only be wiped with a damp cloth.
3. **Assemble:**
 - Place the motor unit on a stable, dry surface.
 - Position the juice collector and pulp collector correctly.
 - Insert the filter basket onto the motor unit, ensuring it is securely seated.
 - Place the lid onto the juicer, aligning it properly and locking any safety clamps if present.
 - Ensure the pusher is ready for use.

2 Speed Mode

OPERATING INSTRUCTIONS

Follow these steps to extract juice from fruits and vegetables:

1. **Prepare Ingredients:** Wash fruits and vegetables thoroughly. Cut them into pieces small enough to fit through the feeding tube. Remove large seeds and hard pits.
2. **Power On:** Ensure the juicer is correctly assembled and plugged into a suitable power outlet. Switch on the juicer.
3. **Juicing Process:**
 - Gradually feed the prepared fruit or vegetable pieces into the feeding tube.
 - Use the pusher to gently guide the ingredients down. Apply light pressure only.
 - The extracted juice will flow into the juice collector, and the pulp will be automatically collected in the pulp collector.
 - Continue extracting juice continuously, but avoid running the juicer unnecessarily when not processing ingredients.
4. **Handling Citrus Fruits:** For citrus fruits like oranges or sweet limes, cut them diametrically to expose the seeds. Peel off the skin. Introduce the fruit with its seeds exposed into the juicer.
Important: Do not use the pusher for citrus fruits. The seeds will pop out automatically, preventing them from being crushed and keeping the juice from becoming bitter.
5. **Emptying Collectors:** When the pulp container or juice collector is full, stop the machine, empty the contents, re-assemble the parts, and continue juicing.
6. **Power Off:** Once juicing is complete, switch off the juicer and unplug it from the power outlet.

MAINTENANCE AND CLEANING

Regular cleaning ensures optimal performance and extends the life of your juicer.

1. **Disassembly:** Unplug the juicer. Disassemble all removable parts: pusher, lid, filter basket, juice collector, and pulp collector.
2. **Washing:**
 - Wash all removable parts by hand using warm soapy water.
 - For the blade and filter basket, rinse thoroughly and use a soft brush to gently remove any pulp residue.
 - The motor unit should be wiped clean with a damp cloth. Never immerse the motor unit in water.
 - All removable parts are dishwasher safe.
3. **Drying and Storage:** Ensure all parts are completely dry before reassembling or storing the juicer. Store in a clean, dry place.

EASY TO WASH

TROUBLESHOOTING

Problem	Possible Cause	Solution
Juicer does not turn on.	Not plugged in; safety lock not engaged; power outage.	Check power connection; ensure all parts are correctly assembled and locked; check household power supply.
Burning smell during operation.	Normal during first few uses (motor varnish); motor overload.	If it's the first use, this is normal. If it persists or is strong, switch off and allow to cool. Reduce load on motor by feeding smaller pieces. If problem continues, contact customer support.
Juicer stops during operation.	Overload protection activated; clogged filter.	Switch off and unplug. Clear any blockages in the filter. Allow motor to cool down before restarting.
Excessive vibration or noise.	Improper assembly; uneven placement; damaged parts.	Ensure all parts are correctly assembled and locked. Place juicer on a flat, stable surface. Inspect for any damaged parts and contact support if found.

PRODUCT SPECIFICATIONS

Feature	Detail
Brand	Rico
Model Number	JEPRO-1905
Wattage	350 Watts
Voltage	230 Volts (AC)
Number of Speeds	2
Material	ABS (Body), Stainless Steel (Blade)
Product Dimensions (D x W x H)	15D x 17W x 31H Centimeters

Feature	Detail
Item Weight	2.6 Kilograms
