

## Threeking Rotation-r

# Threeking RC Stunt Car User Manual

Model: Rotation-r

## INTRODUCTION

Thank you for purchasing the Threeking RC Stunt Car. This remote control car is designed for exciting indoor and outdoor play, featuring double-sided driving, 360-degree rotation, and vibrant LED lights. Please read this manual carefully before operating the product to ensure safe and optimal performance.

## WHAT'S IN THE BOX

- Threeking RC Stunt Car (Rotation-r)
- Remote Control
- Rechargeable Lithium Ion Battery (for car)
- USB Charging Cable
- Screwdriver
- User Manual

## FEATURES

- **RC Rotating Stunt Car:** Capable of double-sided driving, 360-degree flips, and in-place rotations. Features red and blue lights that create vibrant circles during upright rotation.
- **Anti-Interference Control:** Easy-to-use remote control with long-distance and anti-interference capabilities, allowing multiple cars to operate simultaneously without interference.
- **Durable Design for All Terrains:** Equipped with two powerful electric motors and four high-quality, soft, and elastic rubber tires for shock absorption, anti-skid performance, and excellent grip on various surfaces, both indoors and outdoors.
- **Safety and Quality Construction:** Made from high-quality plastic with suitable printing, secured with dozens of screws and high-class electronic elements to ensure structural integrity and safety.
- **User-Friendly Battery Access:** Designed for easy battery removal and charging via the USB charger, enhancing safety during the charging process.

## SPECIFICATIONS

Product Dimensions	7.9 x 6.7 x 4.1 inches
Item Weight	1.23 pounds
Recommended Age	6 - 12 years
Batteries	1 Lithium Ion battery required (for car), AAA batteries for remote (not included)
Brand	Threeking
Model	Rotation-r

## SETUP

### 1. Charge the Car Battery:

- Locate the battery compartment on the bottom of the car.
- Use the provided screwdriver to open the battery cover.

- Remove the rechargeable Lithium Ion battery from the car.
- Connect the battery to the USB charging cable.
- Plug the USB charging cable into a compatible USB power source (e.g., computer USB port, USB wall adapter). Do not use fast USB chargers.
- The indicator light on the charger will typically glow red during charging and turn off or change color when fully charged. Charging time is approximately 1 hour for a 50% to 100% charge.
- Once charged, disconnect the battery and carefully place it back into the car's battery compartment, ensuring the wires are not pinched. Secure the battery cover with the screwdriver.

## **2. Install Remote Control Batteries:**

- Open the battery compartment on the back of the remote control.
- Insert 2 x AAA batteries (not included), observing the correct polarity (+/-).
- Close the battery compartment securely.

## **3. Pairing the Car and Remote:**

- Turn on the car using the power switch located on the car's chassis.
- Turn on the remote control.
- The car and remote should automatically pair. If not, turn both off and on again.

## OPERATING INSTRUCTIONS

The Threeking RC Stunt Car is designed for intuitive control. The remote control typically features two main levers, one for each side's wheels, allowing for precise movements and stunts.

- **Forward/Backward:** Push both levers forward to move the car forward. Pull both levers backward to move the car backward.
- **Turning:** Push one lever forward and pull the other backward to turn the car. For example, push the left lever forward and pull the right lever backward to turn right.
- **360-Degree Rotation:** Push one lever forward and pull the other backward simultaneously to make the car spin in place.
- **Stunts and Flips:** Experiment with different combinations of lever movements to perform various stunts, including flips and double-sided driving. The car's design allows it to continue driving even after flipping over.
- **Demo Mode:** Some remote controls may have a "demo" button that showcases the car's capabilities automatically. Refer to your remote control for specific button functions.

For optimal performance, operate the car on clean, flat surfaces. While the car is designed for various terrains, avoid excessive dirt, water, or very rough surfaces to prolong its lifespan.

## MAINTENANCE

- **Cleaning:** Use a soft, dry cloth to wipe down the car after use. For stubborn dirt, a slightly damp cloth can be used, but ensure no water enters the electronic components. Avoid harsh chemicals.
- **Battery Care:** Always remove the car battery when not in use for extended periods. Store batteries in a cool, dry place. Do not overcharge or completely drain the battery.
- **Storage:** Store the car and remote control in a dry environment, away from direct sunlight and extreme temperatures.
- **Tire Inspection:** Periodically check the tires for any debris or damage. Clean out any dirt from the wheel grooves to maintain optimal grip.

## TROUBLESHOOTING

Problem	Possible Cause	Solution
Car does not respond to remote.	Low car battery; Low remote battery; Car/remote not paired; Power switch off.	Charge car battery; Replace remote batteries; Turn both off and on to re-pair; Ensure power switches are ON.
Car moves slowly or lacks power.	Low car battery; Obstruction in wheels.	Recharge car battery; Check and clear any obstructions from wheels.
Lights are not working.	Low car battery; Internal wiring issue.	Recharge car battery. If problem persists, contact customer support.
Car is noisy during operation.	Debris in gears/axles; Worn parts.	Inspect for and remove debris. If noise persists or is excessive, contact customer support.

## WARRANTY AND SUPPORT

Threeking products are manufactured with high-quality materials and undergo rigorous testing. For any questions, concerns, or technical support, please refer to the contact information provided on the product packaging or visit the official Threeking website. Please retain your proof of purchase for warranty claims. For more information, visit the [Threeking Store on Amazon](#).
