## Philips PerfectCare 9000 Series PSG9050/26

# Philips 9000 Series PSG9050/26 Steam Generator Iron User Manual

Model: PerfectCare 9000 Series PSG9050/26

## INTRODUCTION

This manual provides essential information for the safe and efficient operation, maintenance, and troubleshooting of your Philips 9000 Series PSG9050/26 Steam Generator Iron. Please read it thoroughly before first use and retain it for future reference.

## PRODUCT OVERVIEW

The Philips 9000 Series Steam Generator Iron, showcasing its compact design with the integrated water tank and iron unit.

A top-down view of the iron, highlighting its ergonomic handle and sleek profile.

The SteamGlide Elite Soleplate, designed for optimal gliding and durability, with steam vents visible.

Detail of the control panel, showing the power button and the Easy De-Calc indicator.

## SETUP

### 1. Unpacking and Initial Inspection

Carefully remove all components from the packaging. Inspect the iron and base unit for any signs of damage. Ensure all listed components are present: 1 x Steam Iron unit.

### 2. Filling the Water Tank

The iron features a large 1.8L detachable water tank for easy refilling. Remove the water tank from the base unit. Fill the tank with tap water up to the 'MAX' indication. Reinsert the water tank securely into the base unit.

### 3. Power Connection

Place the steam generator iron on a stable, heat-resistant surface. Unwind the power cord and plug it into a grounded wall socket. The iron is designed for 220-240V AC, 50Hz power supply.

Ensure the power cord is securely plugged into a suitable wall outlet.

## OPERATING INSTRUCTIONS

---

### 1. Powering On and Heating Up

Press the power button on the control panel. The iron will begin to heat up. The indicator light will signal when the iron is ready for use.

### 2. ActiveSense Technology

The Philips 9000 Series features ActiveSense technology, which uses a built-in camera and artificial intelligence to identify the fabric type. It automatically adjusts the ideal temperature and steam amount for optimal results, eliminating the need for manual temperature settings.

### 3. Steam Functions

- **Continuous Steam:** The iron provides a strong, continuous steam output of up to 180g/min, suitable for tackling various fabrics.
- **Steam Boost:** For stubborn creases, press the steam boost button to activate a powerful shot of steam up to 750g. This is ideal for thicker fabrics.
- **Vertical Steaming:** The lightweight iron design allows for effective vertical steaming of hanging garments, curtains, and delicate fabrics. Hold the iron vertically and press the steam button.

### 4. Safety Features

- **No Burns Guarantee:** Thanks to ActiveSense technology, the iron is designed to prevent burns on all ironable garments.
- **Automatic Shut-off:** For safety and energy saving, the iron automatically shuts off when left unattended for a period of time.
- **Safe Carry Lock:** The iron can be securely locked to its base unit for safe and easy transport.

## MAINTENANCE

---

### 1. Easy De-Calc Plus System

The Easy De-Calc Plus system continuously collects limescale. An indicator light and audio signal will alert you when the system needs emptying. Follow the instructions in the quick start guide or on the Philips support website for the specific de-calc procedure.

### 2. Cleaning the Soleplate

To clean the SteamGlide Elite Soleplate, ensure the iron is cool and unplugged. Wipe the soleplate with a damp cloth and a non-abrasive liquid cleaner if necessary. Do not use abrasive scouring pads or harsh chemicals.

### 3. Water Tank Cleaning

Periodically rinse the detachable water tank with clean water. Do not use detergents or cleaning agents inside the water tank.

## TROUBLESHOOTING

Problem	Possible Cause	Solution
No steam output.	Water tank is empty or not properly inserted. Iron not heated to operating temperature.	Fill the water tank and ensure it is securely in place. Wait for the iron to reach operating temperature (indicator light will signal readiness).
Water leakage from the soleplate.	Iron not hot enough for steam generation. Excessive steam boost usage.	Allow the iron to fully heat up before using steam. Avoid pressing the steam boost button too frequently in quick succession. Ensure the Easy De-Calc system is regularly emptied.
Iron does not heat up.	Not plugged in. Power outlet issue. Automatic shut-off activated.	Check if the power cord is securely plugged into a working outlet. Press the power button to restart the iron if it has automatically shut off.
De-Calc indicator light is on.	Limescale needs to be removed from the Easy De-Calc system.	Perform the de-calc procedure as described in the maintenance section or the quick start guide.

## SPECIFICATIONS

**Model Name:** PerfectCare 9000 Series

**Model Number:** PSG9050/26

**Power:** 3100 Watts

**Continuous Steam Output:** Up to 180g/min

**Steam Boost:** Up to 750g

**Pressure:** 9 bar

**Water Tank Capacity:** 1.8 Liters (detachable)

**Soleplate:** SteamGlide Elite

**Weight (Iron):** Approximately 0.97 Kilograms

**Special Features:** ActiveSense Technology, Easy De-Calc Plus, Automatic Shut-off, Safe Carry Lock, Lightweight Iron

**Included Components:** 1 x Steam Iron
