SETUP

The Lantro JS Dart Set comes pre-assembled and ready for use. No additional setup is required for the darts themselves.

1. **Choose a suitable dartboard:** Ensure your dartboard is securely mounted at the correct height and distance according to official dart game rules.
2. **Clear the throwing area:** Make sure there are no obstructions or people in the throwing area or near the dartboard.
3. **Inspect darts:** Before each use, check each dart for any damage, such as bent tips or loose flights. Do not use damaged darts.

OPERATING INSTRUCTIONS

Follow these guidelines for proper and safe dart play:

1. **Grip:** Hold the dart comfortably with your fingers on the barrel. Avoid gripping too tightly.
2. **Stance:** Stand at the throwing line (oche) with your dominant foot forward.
3. **Aim:** Focus on your target on the dartboard.
4. **Throw:** Use a smooth, controlled motion, extending your arm and releasing the dart towards the target.
5. **Retrieval:** Always retrieve darts from the board carefully, pulling them straight out to avoid damaging the board or the darts. Ensure no one is in the path of the dartboard when retrieving.

MAINTENANCE

Proper maintenance will extend the life of your darts:

- **Cleaning:** Wipe darts with a dry, soft cloth after use to remove any dust or residue. Avoid using harsh chemicals.
- **Tip Sharpening:** If dart tips become dull, they can be carefully sharpened with a dart sharpener (not included).

- **Storage:** Store darts in a protective case or holder to prevent damage to the tips and flights. Keep them in a dry place away from extreme temperatures.
- **Flight Replacement:** If flights become damaged or bent, they can be replaced with standard dart flights.

TROUBLESHOOTING

Here are solutions to common issues you might encounter:

Problem	Solution
Dart tips bending easily	Ensure you are throwing into a suitable dartboard. Avoid throwing at hard surfaces. Sharpen tips if they become dull.
Flights detaching or getting damaged	Flights are consumable parts. Reinsert them firmly into the shaft. If severely damaged, replace with new flights. Store darts in a case to protect flights.
Darts not sticking to the board	Check if the dart tips are sharp. If dull, sharpen them. Ensure the dartboard is in good condition and not overly worn.
