## OPERATING INSTRUCTIONS

### Lift-Top Mechanism:

The lift-top feature allows you to easily adjust the height of the tabletop for various uses.

1. To **raise** the tabletop: Gently lift the front edge of the tabletop. The heavy-duty gas lift mechanism will assist in smoothly raising the top to its elevated position.
2. To **lower** the tabletop: Apply gentle downward pressure on the tabletop. The gas lift mechanism will allow it to smoothly and safely descend back to the coffee table position.

The mechanism is designed for silent and shock-absorbing operation, preventing bumping and ensuring smooth transitions.
