Troubleshooting

Problem	Possible Cause	Solution
Scale does not turn on	Dead batteries or AC adapter not connected/faulty.	Replace batteries or ensure AC adapter is securely connected and functional.
Inaccurate readings	Scale not on a level surface, overloaded, or exposed to interference.	Place on a stable, level surface. Do not exceed capacity. Move away from electronic devices.
Display shows "Err"	Overload or internal error.	Remove item if overloaded. Turn scale off and on again. If error persists, contact support.
