- **Cleaning:** Wipe the metal frame with a soft, damp cloth. Avoid using harsh chemicals or abrasive cleaners, as these can damage the finish.

If you encounter any issues with your bed frame, refer to the following common solutions:

- **Squeaking Noise:** If the frame makes noise, check all bolts and connections. Tighten any loose hardware. Ensure slats are properly seated and not rubbing against the frame.
- **Mattress Sliding:** If your mattress tends to slide on the frame, consider placing non-slip pads or a thin rug gripper between the mattress and the slats.
- **Instability/Wobbling:** Ensure all support legs are firmly on the ground and all frame connections are securely tightened. Verify that the frame is on a level surface.
- **Damaged Components:** If any part of the frame appears bent, broken, or welds are compromised, discontinue use immediately and contact COMASACH customer support for assistance.
