5. Troubleshooting

5.1 Zipper Issues

- Problem:** Zipper is stiff or difficult to move.
Solution: Apply a small amount of zipper lubricant (e.g., beeswax or a specialized zipper wax) to the zipper teeth. Gently work the zipper back and forth to distribute the lubricant.
- Problem:** Zipper gets stuck.
Solution: Avoid forcing the zipper. Gently pull the fabric away from the zipper teeth and try to move the slider slowly. Ensure no fabric or items are caught in the zipper mechanism.

5.2 Stains on Fabric

- Problem:** Persistent stains on the bag's exterior.
Solution: For stubborn stains, a specialized fabric cleaner suitable for the bag's material may be used. Always test the cleaner on an inconspicuous area first to ensure it does not cause discoloration.
