Hypermotion Microfiber Cleaning Cloths (12-Pack, Green) Instruction Manual

Model: XWBU-80-001

1. PRODUCT OVERVIEW

The Hypermotion Microfiber Cleaning Cloths are designed for versatile and effective cleaning across various surfaces. These double-sided cloths are constructed from high-quality, non-abrasive, and extra-soft coral velvet microfiber, ensuring strong water absorption and lint-free cleaning. Each pack contains 12 cloths, measuring approximately 6.1 x 10.43 inches (155 x 265mm), with a green and grey color combination.

2. SETUP AND INITIAL USE

Upon receiving your Hypermotion Microfiber Cleaning Cloths, it is recommended to wash them before the first use to maximize their absorbency and softness. Refer to the 'Maintenance and Care' section for detailed washing instructions.

The cloths are ready for immediate use after washing and drying. No assembly is required.

3. OPERATING INSTRUCTIONS

These microfiber cloths are designed for multi-purpose cleaning tasks. Their double-sided design offers enhanced cleaning capabilities.

General Cleaning

- **Wet Use:** For cleaning spills, wiping down kitchen counters, washing dishes, or tackling dirt on various surfaces, dampen the cloth with water or a suitable cleaning solution. The microfiber material is highly absorbent, making it effective for liquid spills.
- **Dry Use:** For dusting, polishing, or drying surfaces, use the cloth dry. Its lint-free nature ensures no residue is left behind, making it ideal for glass, mirrors, and delicate materials without scratching.

Recommended Applications

- **Kitchen:** Ideal for washing dishes, wiping down countertops, stovetops, and appliances.
- **Household:** Effective for dusting furniture, cleaning windows, mirrors, and floors.
- **Automotive:** Suitable for car cleaning, including interior dusting and exterior polishing.

4. MAINTENANCE AND CARE

Proper care will extend the life and effectiveness of your microfiber cleaning cloths.

- **Washing:** Machine washable. Wash with like colors.
- **Drying:** Tumble dry on low heat.
- **Detergent:** Use a liquid detergent.
- **Avoid:** Do not use bleach. Never use fabric softeners, as they can clog the microfiber and reduce its effectiveness.

5. TROUBLESHOOTING

The Hypermotion Microfiber Cleaning Cloths are designed for simplicity and durability. If you encounter any issues, consider the following:

- **Reduced Absorbency:** This can often be resolved by re-washing the cloths without fabric softener, as residue can build up over time. Ensure they are thoroughly rinsed.
- **Linting:** While designed to be lint-free, new cloths may occasionally shed a minimal amount of fiber during initial uses. This should cease after a few washes. If persistent, ensure no fabric softener is being used.
- **Stains:** For stubborn stains on the cloths themselves, pre-soak them in a mild detergent solution before washing. Avoid harsh chemicals that could damage the microfiber.
