2. SAFETY INFORMATION

Always observe the following safety precautions to prevent electric shock, fire, or damage to the product or connected devices:

- Ensure the power cord is fully inserted into both the wall outlet and the device.
- Do not use the power cord if it is damaged, frayed, or has exposed wires.
- Avoid placing heavy objects on the power cord or bending it sharply.
- Do not expose the power cord to water, excessive moisture, or extreme temperatures.

- Unplug the power cord by grasping the plug, not the cable.
- This power cord is designed for indoor use only.

3. SETUP

To set up your Yustda AC Power Cord:

1. Identify the power input port on your Ridgeway QS-1219 12" Portable Bluetooth PA Speaker. This port typically matches the IEC C7 connector on the power cord.
2. Insert the IEC C7 connector end of the Yustda AC Power Cord firmly into the power input port of the speaker.
3. Plug the two-prong US plug end of the power cord into a standard 120V AC wall outlet.
4. Ensure all connections are secure before powering on your device.

4. OPERATION

The Yustda AC Power Cord functions as a direct power supply for your compatible device. Once connected, it provides the necessary electrical current. There are no user-adjustable settings on the power cord itself.

- The cord is designed with safety features including over current, total power, over voltage, and short circuit protection to safeguard your device.
- The cable length is approximately 6 feet (1.8 meters), providing flexibility in placement.

5. MAINTENANCE

Proper maintenance ensures the longevity and safe operation of your power cord:

- Keep the power cord clean and free from dust and debris. Use a dry, soft cloth for cleaning.
- Store the cord in a cool, dry place when not in use. Avoid tight coiling that could stress the cable.
- Regularly inspect the cord for any signs of damage, such as cuts, abrasions, or bent prongs. Discontinue use immediately if damage is found.
