Installation Instructions

Follow these steps to install the GEEKRIA Headband Cover and Pad Set onto your headphones:

1. **Prepare the Headband Cover:** Unzip the headband cover completely.
2. **Insert the Pad:** Place the separate headband pad inside the unzipped cover. Ensure the hook and loop side of the pad aligns with the corresponding fastener inside the cover.
3. **Position on Headphones:** Carefully place the open headband cover, with the pad inside, over your headphone's existing headband.
4. **Zip Up:** Slowly and carefully zip up the cover around your headphone's headband. Ensure the zipper does not snag on any part of your headphones or the internal pad.
5. **Adjust for Comfort:** Once zipped, adjust the cover and pad to ensure it sits evenly and comfortably on your headphone's headband.

Video: A detailed demonstration by GeekriaDirect on how to properly install the over-ear headband cover onto your headphones.

Usage

Once installed, the headband cover provides an additional layer of cushioning and protection. The protein leather material offers a smooth feel, while the internal foam sponge enhances comfort by distributing pressure more evenly across the top of your head. The cover also helps to keep your original headphone headband clean and free from sweat and oils.

Maintenance

To ensure the longevity and hygiene of your GEEKRIA Headband Cover and Pad Set, follow these maintenance guidelines:

- **Cleaning:** Wipe the protein leather surface with a soft, damp cloth. For stubborn dirt, a mild soap solution can be used, followed by wiping with a clean, damp cloth. Avoid harsh chemicals or abrasive cleaners.
- **Drying:** Allow the cover to air dry completely before reattaching it to your headphones. Do not expose to direct sunlight or high heat.
- **Storage:** When not in use, store the headband cover in a clean, dry place away from extreme temperatures.
- **Zipper Care:** Periodically check the zipper for smooth operation. If it becomes stiff, a small amount of zipper lubricant can be applied.

Troubleshooting

- **Cover feels loose or slips:** Ensure the internal pad is correctly positioned and secured with its hook and loop fasteners. Verify that your headphone headband width falls within the compatible range (1 inch - 1.4 inches or 2.5 cm - 3.5 cm).
- **Zipper is difficult to close:** Make sure the headphone headband is fully inserted and not obstructing the zipper path. Gently guide the zipper, ensuring the fabric is not caught.
- **Reduced comfort after installation:** Re-adjust the internal pad to ensure it is centered and evenly distributed along the headband. Confirm that the cover is not too tight or unevenly zipped.

Specifications

Model Number:	PJZ159-02
