ASSEMBLY INSTRUCTIONS

The JEKCA building system utilizes a unique pin-locking mechanism to create sturdy and stable models. Follow these general guidelines and refer to your included detailed instruction manual for specific step-by-step assembly of your Shiba Daruma Doll.

General Assembly Steps:

1. **Identify Components:** Before starting, sort your bricks by color and shape. Familiarize yourself with the pins and the pin driver.

2. **Connect Bricks:** Place two bricks together as indicated in your instruction manual. Ensure the holes align.
3. **Insert Pins:** Use the provided pin driver to insert pins through the aligned holes of the bricks. Push the pins firmly until they are flush or securely seated, locking the bricks together. The pins ensure the structure is robust and does not easily fall apart.
4. **Follow Manual:** Proceed with the assembly by carefully following the detailed diagrams and instructions in your JEKCA instruction manual. Each step builds upon the previous one to form the complete model.

CARE AND MAINTENANCE

To ensure the longevity and appearance of your JEKCA model, follow these simple care instructions:

- **Cleaning:** Dust your model regularly with a soft, dry cloth or a soft brush. For deeper cleaning, gently wipe with a damp cloth and mild soap, then dry immediately. Avoid harsh chemicals or abrasive materials.
- **Storage:** Store your assembled model in a stable location away from direct sunlight and extreme temperatures to prevent discoloration or material degradation.
- **Disassembly:** If disassembling, carefully remove pins using the pin driver. Avoid forcing bricks apart, as this may damage them.

TROUBLESHOOTING

If you encounter any issues during assembly, consider the following:

- **Missing Parts:** Double-check all packaging and sorting trays. If parts are genuinely missing, contact JEKCA customer support.
- **Difficulty Connecting Bricks:** Ensure bricks are correctly aligned and that pins are inserted straight. Do not force connections; refer to the manual for correct orientation.
- **Model Instability:** Verify that all pins are fully inserted and that each connection is secure. Review previous steps in the instruction manual to ensure no steps were missed.
