Miele WWI860 WPS W1 Front-Loading Washing Machine User Manual

Model: 11458480

INTRODUCTION

Welcome to the user manual for your new Miele WWI860 WPS W1 Front-Loading Washing Machine. This appliance is designed to provide exceptional laundry care with advanced features such as the ProfiEco Motor, TwinDos automatic detergent dispensing, QuickPowerWash for fast cycles, and Miele@home connectivity. Please read this manual thoroughly to ensure safe and efficient operation, proper maintenance, and to fully utilize all the innovative functions of your washing machine.

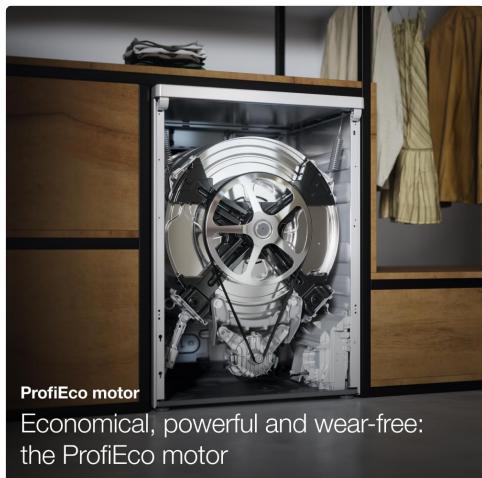

Front view of the Miele WWI860 WPS W1 Washing Machine, showcasing its sleek design and control panel.

SAFETY INFORMATION

- Always ensure the appliance is properly grounded before use.
- Do not allow children to play with or operate the washing machine.
- Unplug the appliance from the power supply before performing any cleaning or maintenance.
- Do not wash items that have been soiled with flammable substances (e.g., gasoline, solvents) as this may cause fire or explosion.
- Ensure all water connections are secure to prevent leaks.

- Do not open the detergent dispenser or door during a wash cycle, especially when the machine is hot or contains water.

PRODUCT FEATURES

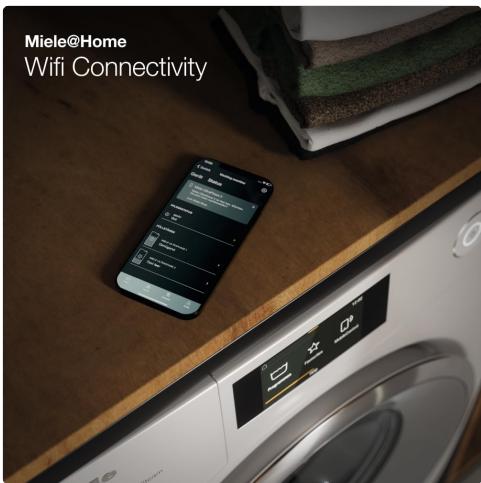

ProfiEco Motor

The Miele ProfiEco inverter drive motor is engineered for powerful, quiet, and economical operation. Its brushless design significantly reduces wear and tear, ensuring long-lasting performance and reliability for years of optimal laundry care.

QuickPowerWash & SingleWash

Experience high-level cleaning performance with QuickPowerWash, completing a full wash cycle in just 49 minutes. For smaller loads or individual items, the SingleWash function provides a quick and economical solution, optimizing water and energy consumption.

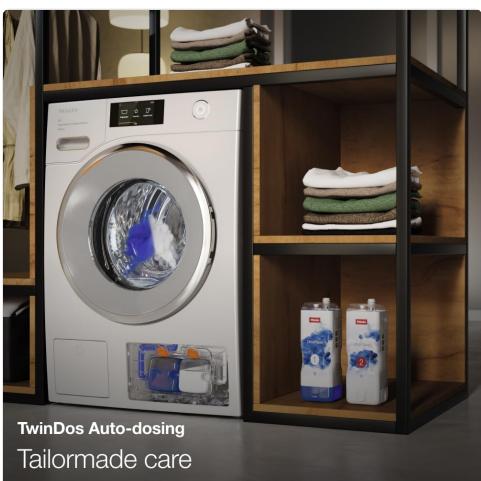

Miele@home System

With the innovative Miele@home system, you can conveniently and securely network your washing machine with other intelligent Miele domestic appliances. Control and monitor your laundry cycles via the Miele app or integrate it into your existing Smart Home solutions for enhanced convenience.

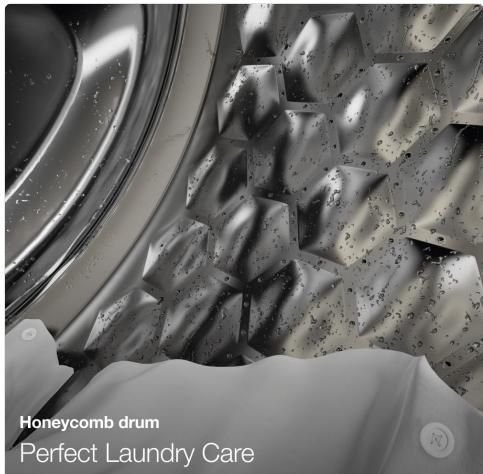

CapDosing

CapDosing allows for optimal dispensing of special-purpose detergents, fabric conditioners, and additives using convenient Miele portioned capsules. Simply insert the capsule into the dedicated compartment for precise and effective care for specific textiles.

TwinDos Automatic Dispensing

The TwinDos system automatically dispenses the optimal amount of liquid detergent at the perfect time during the wash cycle. This two-phase system ensures superior cleaning results for both whites and colors, saving up to 30% on detergent.

Honeycomb drum
Perfect Laundry Care

Honeycomb Drum

The unique hexagonal honeycomb structure of the drum creates a thin film of water between the laundry and the drum, allowing garments to glide gently. This design provides exceptional laundry care, protecting fibers and ensuring thorough yet gentle cleaning.

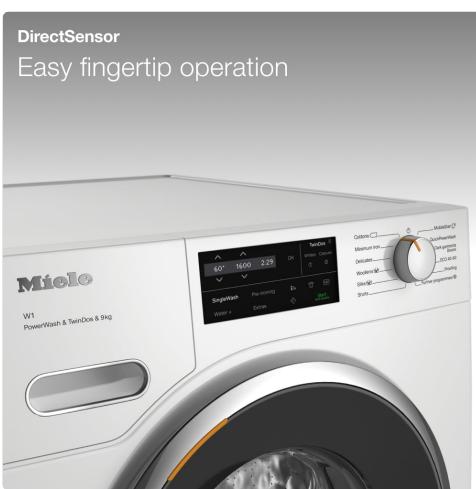

AddLoad
Add forgotten items

AddLoad Function

Forgot a sock or a shirt? The AddLoad function allows you to conveniently add forgotten items of laundry even after the wash program has started, ensuring no item is left behind.

DirectSensor

Easy fingertip operation

ComfortSensor Control Panel

The intuitive ComfortSensor control panel provides easy fingertip operation. Select your desired washing program and settings with precision and ease, making laundry day simpler and more efficient.

Pre-ironing

Reduce creasing and make ironing easier with the Pre-ironing option. This function uses steam to smooth out laundry at the end of the wash program, saving you time and effort.

SETUP AND INSTALLATION

Unpacking

- Carefully remove all packaging materials. Keep packaging for future transport if needed.
- Remove the transport bars from the rear of the machine. Store them safely for future use.

Positioning

- Place the washing machine on a firm, level surface.
- Ensure adequate ventilation around the appliance.
- Adjust the feet to level the machine and prevent vibrations during operation.

Water and Electrical Connection

- Connect the water inlet hose to a cold water supply with a 3/4" thread. Ensure the connection is tight to prevent leaks.
- Position the drain hose into a suitable drain pipe or sink, ensuring it is securely fastened and not kinked.
- Plug the power cord into a properly grounded electrical outlet. Refer to the specifications for voltage requirements.

The Miele WWI860 WPS W1 washing machine seamlessly integrated into a home laundry space.

OPERATING INSTRUCTIONS

Before First Use

- Run an initial wash cycle without laundry to clean the drum and remove any manufacturing residues. Use a small amount of detergent.

Loading Laundry

- Sort laundry by fabric type, color, and degree of soiling.
- Open the door and load laundry loosely into the drum, ensuring not to overload.

- Close the door firmly until it clicks.

Detergent Dispensing

- **TwinDos:** Ensure UltraPhase 1 and UltraPhase 2 containers are inserted correctly. The machine will automatically dispense.
- **CapDosing:** Insert a Miele CapDosing capsule into the designated compartment for special treatments.
- **Manual Dispensing:** For powder or other liquid detergents, use the main detergent drawer.

Program Selection and Start

- Turn the program selector dial to choose your desired wash program (e.g., Cottons, Delicates, Woollens).
- Use the ComfortSensor display to adjust temperature, spin speed, and select additional options (e.g., QuickPowerWash, Pre-ironing, AddLoad).
- Press the "Start/Stop" button to begin the wash cycle.

A user selecting a wash program on the Miele WWI860 WPS W1 washing machine's control panel.

MAINTENANCE AND CARE

Cleaning the Exterior

- Wipe the exterior surfaces with a soft, damp cloth. Do not use abrasive cleaners or solvents.

Cleaning the Detergent Dispenser

- Regularly remove and clean the detergent dispenser drawer under running water to prevent residue buildup.

Drum Cleaning

- Run a "Maintenance Wash" program (if available) or a hot wash cycle with a drum cleaner or a small amount of detergent periodically to prevent odors and buildup.

Filter Cleaning

- Locate and clean the drain pump filter regularly to remove lint and small objects. Refer to the diagram in the full manual for exact location.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Machine does not start	No power supply; Door not closed properly; Program not selected.	Check power plug and fuse; Ensure door is firmly closed; Select a program and press Start.
Excessive vibration/noise	Machine not level; Transport bars not removed; Overloaded drum.	Adjust leveling feet; Remove transport bars (if not already done); Reduce laundry load.
Water not draining	Drain hose kinked or blocked; Drain pump filter clogged.	Check and straighten drain hose; Clean the drain pump filter.
Detergent residues in dispenser	Insufficient water pressure; Detergent clumping; Dispenser dirty.	Check water supply; Use less detergent or dissolve powder; Clean dispenser drawer.

For more detailed troubleshooting or issues not listed here, please refer to the comprehensive troubleshooting guide in the full product manual or contact Miele customer support.
