2. PRODUCT OVERVIEW AND FEATURES

The Lomiluskr K680T is an ultra-compact 60% mechanical keyboard designed for versatility and performance.

It offers both Bluetooth wireless and wired connectivity, making it suitable for various devices and environments.

- **68-Key Mini and Compact Layout:** Optimized for space-saving while retaining essential keys for gaming and daily use. Dimensions: 13.4 x 4.25 x 1.4 inches.

- **Bluetooth Wireless/Wired Dual Mode:** Seamlessly switch between Bluetooth 3.0 wireless connection (up to 10 meters) and wired USB-C mode. The wired mode also charges the keyboard.

- **Multi-Device Connection:** Connects up to 3 devices simultaneously via Bluetooth, easily switchable with FN+Q/W/E.

- **1000mAh Built-in Large Capacity Battery:** Provides extended usage time, approximately 10 hours with backlight on, and up to 60 hours with backlight off. Standby time is up to 360 hours with 3 hours fast charging time.

- **18 Light Effects:** Features a white backlight with 18 customizable lighting modes (flashing, static, breathing, etc.). Brightness and speed are adjustable.

- **Professional Mechanical Switches:** Equipped with brown mechanical switches for a balanced typing and gaming experience, offering a lightweight, weak tactile, and audible feedback. Designed for over 50 million clicks.

- **N-Key Rollover:** In wired mode, all keys are registered simultaneously, preventing ghosting during intense use.

3. SETUP GUIDE

3.1 Wired Mode Setup

To use the keyboard in wired mode, simply connect the provided USB-C cable from the keyboard to an available USB port on your computer or device. The keyboard will be automatically recognized and will begin charging.

3.2 Bluetooth Mode Setup

The K680T keyboard supports connecting up to three Bluetooth devices. Follow these steps to pair your keyboard:

1. **Step 1:** Locate the switch on the bottom of the keyboard and dial it to the "BT" position.
2. **Step 2:** Select a device slot by pressing **FN + Q** (Device 1, indicator light red), **FN + W** (Device 2, indicator

light green), or **FN + E** (Device 3, indicator light blue). This product can memorize 3 devices, stored in Q/W/E buttons.

3. **Step 3:** Press and hold **FN + P** for 2 seconds. Release the keys when the indicator light flashes, indicating the keyboard is in pairing mode.

4. **Step 4:** On your device (computer, tablet, smartphone), turn on its Bluetooth function and search for available devices.

5. **Step 5:** Find the device named "AJAZZ K680T Keyboard" in the list and click "Connect" to complete the pairing process.

5. MAINTENANCE

To ensure the longevity and optimal performance of your Lomiluskr K680T keyboard, follow these maintenance guidelines:

- **Cleaning:** Regularly clean the keyboard with a soft, dry cloth. For deeper cleaning, use compressed air to remove dust and debris from between the keycaps. You may carefully remove keycaps for thorough cleaning, but ensure to reattach them correctly.

- **Avoid Liquids:** Keep liquids away from the keyboard to prevent damage to the internal electronics. In case of spills, immediately disconnect the keyboard and allow it to dry completely before reconnecting.

- **Battery Care:** To prolong battery life, avoid fully discharging the keyboard frequently. Charge the keyboard

when the battery indicator is low. Store the keyboard in a cool, dry place when not in use for extended periods.

- **Storage:** Store the keyboard in a clean, dust-free environment. Avoid exposing it to extreme temperatures or direct sunlight.

6. TROUBLESHOOTING

If you encounter issues with your Lomiluskr K680T keyboard, please refer to the following common problems and solutions:

6.1 Bluetooth Connectivity Issues

- **Keyboard not pairing:** Ensure the switch on the bottom of the keyboard is set to "BT". Confirm the keyboard is in pairing mode (FN+P held for 2 seconds until indicator flashes). Make sure your device's Bluetooth is enabled and within the 10-meter range. Try restarting both the keyboard and your device.
- **Intermittent connection or repeated key presses:** This can sometimes occur with Bluetooth connections. Try re-pairing the keyboard with your device. Ensure there are no strong interferences (e.g., other wireless devices) nearby. If the issue persists, try using the keyboard in wired mode.

6.2 Key Input Problems

- **Keys not responding:** Ensure the keyboard is properly connected (either via Bluetooth or wired). Check the battery level if in Bluetooth mode. If in wired mode, ensure the USB-C cable is securely connected.
- **F-keys (F1-F12) not working as expected:** Remember that F-keys require the **Fn** key to be held down simultaneously (e.g., Fn + 1 for F1). Some devices or operating systems might require specific driver installations or settings adjustments for full compatibility with compact keyboards.

6.3 Backlight Issues

- **Backlight not turning on:** Ensure the keyboard has sufficient battery charge. Try adjusting the brightness using **FN +** ↑ (Up Arrow).
- **Backlight not changing effects:** Cycle through effects using **FN +** → (Right Arrow).
